

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

STATE OF INDIANA.

EIGHTH BIENNIAL REPORT

(FOURTEENTH VOLUME)

OF THE

Indiana Department of Statistics

For 1899 and 1900.

14

JOHN B. CONNER, Chief of Bureau.

To the Governor and Sixty-Second General Assembly.

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING.

1900

61 1/2 1

THE NEW YORK
PUBLIC LIBRARY

216486

ASTOR, LENOX AND
TILDEN FOUNDATIONS.
1901

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
September 7, 1900. }

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, September 7, 1900. }

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

W. H. HART,
Auditor of State.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

CHAS. E. WILSON,
Private Secretary.

Filed in the office of the Secretary of State of the State of Indiana, September 7, 1900.

UNION B. HUNT,
Secretary of State.

Received the within report and delivered to the printer this 7th day of September, 1900.

THOS. J. CARTER,
Clerk Printing Bureau.

LETTER OF TRANSMITTAL.

To the Governor and General Assembly of Indiana :

In accordance with the law establishing and governing the Indiana Bureau of Statistics, I hereby present you with the eighth biennial report (14th volume) of this Bureau.

Very respectfully yours,

JOHN B. CONNER,
Chief of Bureau.

REPORT FOR 1899 AND 1900.

One of the most important features of the report is that of the distribution of wealth in Indiana. No attempt has ever before been made to collect and compile the facts on this subject. In undertaking this work it was believed that nothing could more effectually show the progress of the State and the condition of its people. For this purpose the four decennial periods of 1870, 1880, 1890 and 1900 were selected, as by a comparison of the same facts for the four dates the growth and real conditions could be better seen and understood. The facts presented in the ninety-two tables by counties are predicated on the quadrennial appraisement of the real estate and the annual valuation of improvements and personal property under the law of the State.

The property ownership is divided into twenty-five classes for the four periods, and the holdings are reckoned to each class for each period by counties. The total valuations by counties are also given for the same periods. It will be noted how both the total values by counties and the holdings by classes varied under conditions of business depression and prosperity. It is interesting, also, to note that while in many counties the values of property acquired by the people of the State increased more rapidly than population, in some others there was a decrease. It is most gratifying to note, also, that the classes of the smaller holdings in value have increased in numbers far more rapidly than those of large holdings. The facts show that in some counties where this has occurred, large estates disappeared, indicative of the well-known fact that these were divided into classes of smaller property values.

It should be borne in mind that the entire inhabitants of the State, including sex and age, are embraced in the compilations. This feature is specially shown in the recapitulations given at the bottom of each county table in both per cents. of non-ownership and in ownership of property for 1900. The recapitulation in a single table for all the counties of the State make the facts of entire ownership by classes in values for the several periods named a most interesting study of the distribution of wealth for the entire State. The item of property

ownership by companies and corporations are also embraced in the four periods, but it was not possible with the appropriation for this work to pursue this feature farther than was done, in securing the property holdings and values of these in amounts of \$10,000 and more. The results show, however, how rapidly companies have been organized during the several periods named.

Another new feature of work is that of enquiry into the economic conditions of the several counties and townships under the reform legislations of 1899. The tables referring to this show a marked reduction of current appropriations under these laws in local administration.

The several tables compiled from the enquiries made respecting the condition of organized labor throughout the State will afford much information on this subject. The replies to the enquiries were by no means full, but enough was elicited to show something of the condition of labor. The enquiries were made through the various labor organizations, and the notes accompanying the tables will more fully explain them.

The enquiries into the operations of electric light and power, gas and water plants, though not full and complete as desired, will afford some information respecting these. The reference to this work is more fully explained in the notes accompanying the tables in that part of the report.

The tables in other features of the report are accompanied with explanatory notes, to which reference is made.

OF THE LAW AND OF ECONOMICS.

An address delivered by General James W. Latta, Secretary of Internal Affairs of Pennsylvania, before the 16th Annual Convention of the National Association of Officials of Bureaus of Labor Statistics, Milwaukee, Wisconsin, July 11, 1900.

The wisdom of the judge has often been questioned, his integrity sometimes assailed, but the law he interprets has rarely been defied. Whatever denunciation may reach other governmental functions, the law and its administration have always commanded respect, not for the awe it inspires or the fear it engenders, but for the inherent regard its majesty invokes. The majesty of the law is the only sovereign the Republic knows. Puncture the integrity of its enforcement and the throne itself is threatened. The complaints of the disappointed suitor, the infrequent preferences of prejudice, the incidental exhibitions of passion, the rare suspicions of corruption, the occasional uncorrected errors of judicial incapacity never disturb the concession to the august supremacy of the law. Improvident corporation legislation, pre-election legislation providing methods that may subsequently be made operative to overcome the popular will, obnoxious statutes, the repeal of which their rigorous enforcement sometimes coerces, have in no wise impaired the exercise of authority for the preservation of right, the prohibition of wrong. The supreme power of the State still commands. The rule of action it prescribes is still the law.

The State protects itself against those who would destroy it, society against crime, the individual against injury. Against the person of the convict and the property of the delinquent the law executes its decrees. In the one instance the injury done society is atoned for; in the other the wrongs done the individual are righted. The body answers for the crime; the property responds for the delinquency.

The system of rules and regulations which is recognized as the law that among men governs their intercourse with each other and protects society from crime, is that law of personal security whose supremacy commands respect, elicits obedience. The political environment that concerns the administration of the governmental functions that maintain liberty, resist invasion, subdue riot, suppress

insurrection, is the propagator of the more exalted sentiment of patriotism, the patriotism that recognizes the flag of our country as the common conservator of our national dignity, the common arbiter of our national destiny. "In everything which concerns civil and political liberty," says an eminent text writer, "no system has yet been devised that can be compared with the free spirit of the English and American common law."

The common law is a creature of conditions and necessities. It is custom and usage gradually adopted, sanctioned by the courts. It was before legislatures were, and has been since. All law did not begin by legislative consent, and therefore the common law is not as one of the earlier writers phrases it "statutes worn out by time." A better comprehension of its origin and stability is supplied by Sir Matthew Hale. "It is not," he says, "the product of the wisdom of some one man or society of men in any one age, but the wisdom, counsel, experience and observation of many ages of wise and observing men." It is indigenous where constitutional liberty thrives; elsewhere it is an exotic.

Wherein had this free spirit of the common law its earliest manifestations? The common law is a rich illustration of the processes of evolution. Born of the villages in the jutting peninsulas that narrow the Baltic, and their adjacent lowlands, its traditional developments "preserved in a nation's memories" reached their fullest fruition in the treaty King John made with his barons in the beginning of the thirteenth century. The age of traditional rights was to pass away and "the age of written legislation of parliaments and statutes was to come." The youth in the academy, in his first attempt at English composition, rarely fails to exploit something of Runnymede, the Barons, King John and the charter. The profoundest statesman finds inspiration in the theme, and so it will ever be.

The full intendment of this ancient declaration is frequently overlooked. Had it been confined to the barons, as their prominence in forcing its initiative would indicate was its purpose, its perpetuity would never have been stamped, as it has been, upon free institutions everywhere. The rights secured were "not of baron and churchmen only, but of freeholder and merchant, of townsman and villein." Where the privilege of the simple freeman is not secured by the clause which primarily affects the baron, a supplementary clause is added to define and protect his rights. The merchant, it was agreed, might go out of the kingdom and return at his pleasure. He was to be protected by a uniform standard of weights and measures, and allowed to transact his business free from arbitrary tolls

and impositions. Trade was invited from abroad, and the foreign merchant encouraged to visit the kingdom by the protection accorded him. No fine could be levied to the utter ruin of anyone, and the villein or rustic by fine or amercement was not to be deprived of his horses, his carts, his ploughs, or implements of husbandry. An exemption law had for the first time declared its purpose. One of the concluding clauses is of forceful significance. It embodies provisions so essential to the maintenance of constitutional government that with but little modification they have ever appeared in the fundamental law of every free state. "No freeman shall be taken or imprisoned or disseized or outlawed or exiled or anywise destroyed; nor will we go upon him, nor send upon him, but by the lawful judgment of his peers or the law of the land. To none will we sell, to none will we deny or delay, right or justice!"

What were the contemporaneous opportunities elsewhere, save under the favor of royal prerogative, where the free spirit of the common law was unknown? Mark the contrast of these insular concessions with the interruptions and restrictions that beset the trader in the Latin countries of the Continent. The king's right to the market was assured by the law. When his vintage came to town, the innkeeper closed his doors, the wine shop ceased to do business until His Majesty's stock was disposed of. And there were other formidable rivals; the Seigneur and Abbe came after the king and held the monopoly. "Where king, noble, or cleric turned tradesman for the nonce, the tradesman as such went promptly to the wall."

The king, by the fiction of a divine right, was prone to be a law unto himself. The obedience he yielded to his Parliament was a reluctant obedience. The distinction between the constitutional sovereign and the sovereign of divine right, the sovereign absolute, is forcefully suggested in a neatly constructed dispatch of Lord Roberts reporting one of his recent operations in South Africa. "I hope that Her Majesty's government (not her majesty) may consider the event satisfactory, occurring as it does, on the anniversary of Majuba." Learned jurists interpreted the common law, scholarly commentators expounded it, the king forgetful of his pledges sometimes interrupted the free spirit of its liberty. Though its force was at times suspended, its substance was never impaired. Cromwell had overcome the divine dynasty and was ready to accept a constitutional monarchy; but the king was utterly untrustworthy, and the army defiant, intolerant, arrogant. The peaceful revolution later on achieved what its bloodier predecessor had practically accomplished, and the law was forever freed from other kingly interruptions at home.

The king was not so content to desist from interference with the operations of the common law in his colonial possessions. It was no exotic when transplanted to the temperate zones of the North American Continent. Here it flourished with prodigious growth. The Mayflower Pilgrims before they secured their landing place solemnly covenanted, in the cabin of their vessel, that the will of the majority should be the law of the land. The welcome bore across tempestuous seas to her Pennsylvania destination the "Frame of Government," drafted by the founder of the province, as the creed of his "Holy Experiment." Of its many potent declarations there was no more forceful deliverance than this, "Any government is free to the people under it, where the laws rule and the people are a party to these laws." How nearly he had reached the phrase, with which amid the perils of our civil war the immortal Lincoln subsequently electrified the nation, "A government of the people, for the people and by the people shall not perish from the earth!" More than one hundred and fifty years before the United Colonies declared themselves a free and independent nation they were approaching perilously near a Republic.

An American writer of much reputation has recently declared in a magazine contribution of especial value, "The true principles of religious tolerance and political equality in all their bearings were beyond the grasp of the seventeenth century." The qualification, "in all their bearings," preserves the writer's conclusions to a better fate than a critical analysis would otherwise accord them. The intolerance that was furious in Great Britain, relentless in Massachusetts, was unknown in Pennsylvania. That Providence greeted every creed, doctrine and sect alike. Within its limits every man might in truth and fact worship God according to the dictates of his own conscience; nor could he, as the humorist has phrased it, prevent every other man from worshipping God according to the dictates of his. So conspicuous was Pennsylvania for its absolute freedom of worship, amid these prevalent intolerances that Goldwin Smith has styled the Province "A religious museum." The exhibition is still on view without charge. Maryland, Rhode Island and New York were in their constructive period scarce a whit behind. Political equality had a more universal acceptance than religious tolerance, certainly upon this side of the Atlantic. The few years of theocratic government in Massachusetts, that restricted the suffrage to the church, disappeared before the seventeenth century went out. Representative government in some form prevailed in all of the colonies, and the people seemed never better satisfied than when through their repre-

sentatives they were either delaying payment of or cutting down the salaries of their royal governors.

The common law with its free spirit of liberty finds a more congenial home wherever the flag floats "over the land of the free and the home of the brave." It is fitted alike for all colors, all races, all conditions. Its firmest abiding place has been the United States of North America where the amplitude of its far-reaching equalities includes Saxon and Teuton, Latin and Celt, Slav and Scandinavian. The distant orient feels the stimulus of its attainable possibilities, and the islands that were of the Spanish Main are looking to the new life its guarantees assure. It is as beneficent in peace as it is rigorous in war. It has brought revolution to success, routed rebellion, suppressed insurrection, made a nation and set the bondman free. It has created generals capable for the field, jurists learned for the forum, statesmen skilled for the cabinet. The state, the church and the family have ever been its especial trusts, and to them all it has faithfully discharged the full purpose of its mission.

In the early middle ages nearly all there was of learning was embodied in theology or law. Scarce any other branch of knowledge was yet of sufficient compass to maintain for itself a separate establishment. Questions of industrial policy were treated of as incidental details in the one or the other of the two systems. It may not be inappropriate therefore, economics now conducting its own independent establishment, to place it in touch with an acquaintance of its youth for a brief association.

More than a century since it began to be accepted with some crudity that the lives men lead and the callings men pursue in the relations that sustain the one and the conditions that support the other were collectively deducible to such principles as to evolve a science. As this acceptance grew to conviction, the philosopher sought to so apply the science as to deduce from it such a useful art that its application might inure for the general betterment. Known in its earlier conception as political economy, it has so broadened itself as to include as well, sociology, which though of junior creation now dominates it; and statistics still of later birth is also its close correlated adjunct. A science may be either the methodical collection of certain associated principles, causes and effects verified by observation, or it may be the result of the research of discovery or the application of invention. The ultimate mission of science is that it shall accomplish a practical and substantial purpose.

Economics is made up of environment. It is the scientific rendering of educated observation. The better intelligences accept its propo-

sitions, recognize its conclusions. The prudent and thrifty abide by its teachings. The ignorant and idle are restive under its requirements.

Man lives in an atmosphere of economics and yields unconscious obedience to its behests. On terms of closest intimacy with its operations, he yet is a stranger to the science as a science. The aim of life in the material spheres is the satisfaction of desires. This end is obtained by the unconscious obedience to the requirements of a science with which the seeker for the end has but a partial acquaintance. He prefers to accept the acquaintance for what it is worth, rather than be burdened with the study that a broader knowledge demands.

Economics is a science that subtly formulates its judgments, subtly draws its conclusions. Its decrees are executed by the very virtue of necessity. The state is the master of society, enforces respect through authority, executes its purpose by the inherent strength of the laws it has created. Economics is so far dependent upon the state that it survives only upon the social structure the state preserves. Though neither of inspiration nor prophecy, economics stands to material life as a creed does to spiritual.

Roman civilization was never softened by the acceptance of a Christian faith. Whatever contributions its wise men may have made to its stability, they never scientifically adjusted economical conditions towards its permanency. There were discordant differences between its social classes. The central power claimed a fancied omnipotence. The irresistible laws of human nature were neglected. Patrician dignity was wounded if touched by the middle class. This estrangement was Rome's sorest trial in the hour of her greatest misfortune. The misfortune came when the northern barbarians overran the Provinces and the city itself. Savagery has always accepted modern civilization or disappeared before it. Not so with the ancient. The middle classes preferred its rough justice to the tyrannous exactions of the patricians. The Roman arms could not overcome the invasion, nor the influences of an effete and waning civilization persuade the savage hordes to accept it.

Economics has never failed to meet new inventions, new conditions. The trust was supposed to have dealt a staggering blow to the axiom that "competition is the life of trade." Whether competition does not yet survive and is not yet ready with its blow to equally stagger the trust still awaits determination. Combination is the antithesis of competition. Trade is no stranger to either. In a modest way combination has been the engine to stiffen a breaking or advance a

steady market. In a cruel way it has been a method to carry to commercial oblivion many who would have been glad to be permitted to be advantaged by its opportunities.

By the law a man may do what he will with his own. A cardinal tenet of the economic science is that all his belongings are his for the satisfaction of his desires and it is of his own free will whether he accepts or rejects the doctrines of religion. He must not violate the rights of his neighbor, otherwise his morals, his gains, his labor, his possessions are solely for his individual disposition.

The dogmas of the faith as expounded by the fathers were most seriously opposed, because it was contended that with their acceptance, man surrendered his free agency. If it has been foreordained whatsoever should come to pass, then the purpose of man to work out his own salvation has been denied him; it has been anticipated by a selection, in which he has had no part. The Christian church was rent in twain. Schism, creed and doctrine not content with intellectual combat drenched Continental Europe in bloody battle for more than half a century. But the Christian faith still survives and man is as fully recognized as a free agent in things spiritual as it is admitted he is in things material.

Is that free agency still conceded him in his material affairs? Has the economic principle of the personal disposition of possessions for the satisfaction of desires collapsed, or the law's provision that a man may do what he will with his own been suspended, because of existing social conditions beyond the reach of the economic art? Such would seem to be the conclusion of the distinguished scholar who presides at that eminent seat of learning, the Yale University. In his work, "Economics, an account of the Relations between Private Property and Public Welfare," Prof. Hadley subjects the question to this treatment. "Although laws," he says, "prescribing what a man may buy or sell have fallen into disuse, it must not be supposed that every man exercises his intelligence and pleasure to buy what will give him the most happiness." * * * "A large part of the expense of most people is regulated not by their own desires and demands, but by the demands of the public sentiment of the community about them." * * * "The standard of life in every family is fixed in large measure by social conventions." * * * "Although we have made much progress in the direction of economic freedom, it is a mistake to assume that the authority of custom in these matters is a thing of the past. With most men custom regulates their economic action more potently than any calculation of utility which they are able to make." There would be a loneliness about the result of such a

calculation that would severely neutralize its utility, if custom were out of it entirely and individuality its only basis. Isolation is a bane to usefulness. Its saving antidote is companionship. The cloister and the closet life is a hindrance to development. Nature makes the whole world kin.

Man must be within society to be within the pale of economic authority. If he chooses to clothe or equip himself in a strange garb, deny the fashions and disport himself against the usages of society, he is outside its pale and its influence. His pleasures unfit him for social contact. If he is not of contact with his fellows, he is not of society and consequently not a subject for economic discussion. Custom is a king in society without judicial or legislative restraint. Obedience or exclusion is the alternative decree. Obedience would be less onerous if extravagances were curtailed, foibles diminished and waste eliminated. But these are of detail subject to change and controllable by usage, they in no wise impair the structure itself. The social compact makes the State; the State preserves the social compact. Why seek to establish a standard of economic freedom apart from either the State or society? Without society and its customs and the State and its laws economics has no abiding place. Nomadic life, rural life, savage life need no touch of economic direction, seek no help from economic guidance. Out of society where will man find happiness? It can not diminish his independence to be where happiness only can be found.

And then the learned author turns to the present business methods as another formidable barrier to the free exercise of individual judgment. "The success of advertising," he declares, "shows how little intelligence is habitually exercised in these matters." Solicitation so induces buyers that, as he deduces it, "three-quarters of them exercise no choice at all." The drummer, the newspaper, the poster, the five-cent store and the bargain counter, to follow the professor's own forcible diction, are "the drums and trumpets" that abuse man's "nominal freedom" and "tell him in stentorian tones what he wants to buy."

A bargain like an agreement is a meeting of two minds, or in familiar parlance "it takes two to make a bargain." The satisfaction of desire or the right to do what he will with his own is not the purchaser's exclusive right. A like privilege prevails equally with the seller. The over-persuasion of the vendor in no way disturbs the right of the purchaser to think for himself. A horse trade is proverbial as a fine illustration of David Harner's paraphrase of the Golden Rule "Do unto the other fellow the way he'd like to do unto you, an' do it

fast." In no other transaction are the faculties so strained, the wits so quickened, the lie so frequent, except the veriest guy venture upon the market. Is the shop-keeper the sole arbiter of his own bargain counter? He may at times lure the unwary, but he is as apt to meet not a few, notably of the other sex, equally quick-witted with himself. If the merchant be at all fair in his ethics, may not his experience assure a better bargain than not infrequently would be induced by the crude notions of his customers? American women were never better dressed, American children were never better clothed than they are to-day. Americans were never better fed, never better housed than they are in this the close of this wonderful nineteenth century. An excellent fit and tasty pattern are the noticeable feature of the dress of women of every class, and men are a close second. Has not the trader, with his training, added something to these conditions, especially among those whose employment and situation have limited their opportunity for choice? Independent action can not be measured by a failure to assert it where the right to independent action exists; nor economic freedom be impaired for lack of knowledge or opportunity to best maintain it.

For the present, it would seem, that society must be content with observation for a reasonable assurance of its betterment in diet and dress. Sociology demands a statistical basis, declines to infer and is slow to act on estimation. Its better philosophical suggestion is that as social statistics present the most delicate questions, "with facts themselves so elusive as to escape exact expression," correct analysis and interpretation are attended with much hindrance. Statistical data that would express the motives of men's actions are unattainable. If they were it is admitted it would be seen how in many cases "the narrow line of family relation makes itself felt in the broader manifestation of social life." "The family is the important factor in the growth of population." "Family life is the foundation of the moral life of the community."

The family, the dwelling and the wage have been in many details subjects for wide sociological treatment from effective statistical data and classification. "All social conditions have intimate connections with the family and family life." While in France 14 per cent. of families consist of one individual, there are but 7 per cent. of such families in Germany and 3.63 per cent. in the United States. Everywhere there are more families than dwellings. In the United States there are 10.5 per cent. more families than dwellings. In the agricultural States of the South the excess is very small, while in Massachusetts it is 35 per cent., in Rhode Island 43.5, in New York 46.5.

It is, of course, in the cities where there are the largest number of persons and families to a house. In New York 46 per cent. of the dwellings have one family, 11 per cent. two families and 43 per cent. three families and more. In Brooklyn 51 per cent. one family, 23 per cent. two families, 26 per cent. three or more, while Philadelphia has almost as many houses as families. Of Philadelphia it may also be noticed that despite the marked tendency towards decrease in the size of the family in cities, that city seems less affected by the decrease, and the number of persons to the family is greater there than in any of the larger cities of the country.

The tenement house and the apartment house are modern innovations. The tenement bodes of evil, unless its outside sanitary conditions for light and air, and its inside for ventilation and cleanliness, shall be controlled by official supervision. The apartment house is not the American home. It is a menace to the fireside. It offers relief from the cares of house-keeping, presents strong temptations to abandon family responsibilities, tends to lessen progeny, and extends enticing greetings to accept the gossipy comforts of its proffered idleness. With such a contemplation John Howard Payne's muse would never have been thrilled to the production of his unequalled verse. No such inspiration would ever have impelled the creation of the beautiful stanzas of "Home, Sweet Home." The law rarely given to sentimental demonstration is awake to the invasion of the sacred precincts of the home. The State, when it delegates so great a power as the right of eminent domain to the railway corporation, exempts from its operations the dwelling house when in the occupancy of its owner. The railway may take for a just compensation all other property essential to the proper development of its franchise, but the home is preserved inviolate against intrusion.

The American wage is the highest wage anywhere. The body of workers is of the highest efficiency, and the results obtained from the American wage are the best results. Whatever improvidence sometimes attends the wage-earner's expenditures, he so adjusts his means of livelihood to the prices of the necessities and comforts of life as to assure to himself a better social condition than is anywhere else attainable. His social contentment gives capital its confidence, and his steady employment at remunerative rates is the foundation for the best economic environment.

Hunger hinders progress. A poorly nourished community can not be expected to be an enterprising community. Diet and the tenement, like food and raiment, are in responsive relationship. If men are better housed, it is conclusive that they will be better fed. Clean-

liness follows, and health follows cleanliness. It is not so very long ago, as history measures time, since society ate with its fingers instead of its fork. A gentlewoman of France boasted that she had not washed her hands for eight days. Peter the Great was shunned at the Court of Elizabeth because of his uncleanly ways, and that Court itself was quite culpable in a like direction. Lady Mary Wortley Montague, "the liveliest, wittiest, severest" was said to be the "dirtiest" woman of her time. Philip II. of Spain, commenting on a most important state paper submitted for his criticism, where reference had been made to the presence of lice in the location of which the paper treated, made the single marginal note, "they might have been fleas." That portion of our urban population living by the closest economy has better opportunity for cleanliness than in days not so very distant was permitted to princes and potentates. There is no house of modern construction without its bath, no matter how diminutive its proportions. The tenement, when sanitary inspection shall have wider enforcement, will be supplied with like facilities. The country side is apace with opportunities for like advantages which have already found place in city life.

Public authority has a closer grip on sanitation than ever before. There is a more generous disposition to deal with its exercise uncomplainingly. The aim of medicine is prevention rather than remedy. Every menace to the public health is sought to be brought within the purview of the law. Its police power is summoned to reach otherwise unsolvable problems. The Slaughter House cases, commonly so styled, where Louisiana to protect the health of the city of New Orleans created a huge monopoly, which it was contended impaired privileges and immunities fundamentally guaranteed; the cases sustaining the various statutes of the several States regulating the practice of medicine, dentistry, pharmacy to protect the public against the ignorant and incompetent practitioner are of the numerous instances of the law's determination to invoke the police power alone, should other reasons be wanting.

Observe the contrast when learned men even were called upon to determine questions of like import in the olden time. A street in old Paris, on which was located a convent, was to be paved at the expense of the inhabitants. When the convent was solicited for its share of the contribution the abbess declined to respond, maintaining that the vows of her order invoked nothing in the matter of public cleanliness. On appeal to the ecclesiastical jurisdiction upon which rested the ultimate determination of the issue, the abbess was sustained upon the ground that there was no precedent for taxing religion in the interests

of science. Municipal authority did not always choose to assert itself, but whenever it did its efforts were everywhere defied despite the ravages of disease and the frequent recurrence of the plague.

The college professor has latterly become a valuable instructor in the lessons of every-day life, and his own better familiarity with those very lessons has by no means lessened his opportunities. Known heretofore only to his pupils, his faculty, in his classroom and his study, the whole reading public now claim his acquaintanceship. His appearance on the lecture platform, his numerous contributions to magazine and periodical, his scholarly additions to literature, science, art, history, in book and pamphlet, have so widened his influence that the public as well as the student have the advantage of his attainments. Application of occurrence to principle, analysis, illustration have measurably enlarged the usefulness of the text-book, to which, until recently, the professor's authorship had been almost solely confined. If the pupil was letter perfect in text-book lore, he had a reasonable expectancy of a satisfactory acquaintance. Memory had not that intimate association with understanding which by a better developed system it is now sought to encourage.

The American people have but scant tolerance for inherited distinction, whether of title or based upon what some one else has done. On the other hand, the American looks kindly "upon military titles, upon professional titles, upon political titles." In themselves they represent achievement and stand for personal effort and success. When distinction is once won and worthily won, he who secures it never fails of appreciative recognition. All men who have won distinction have contributed something to the State. None more than those who write.

Where is there more resourceful history, reminiscent and philosophic, riper scientific criticism, richer biographical review, than from his vast acquirements John Fiske has supplied to American literature? Where has the culture of the faculty been better presented for public appreciation than by Woodrow Wilson, Moses Coit Tyler, Franklin Henry Giddings, Benjamin Ide Wheeler? Who would ever have felt, despite of what he knew before, that he ever had close acquaintance with Napoleon and his times, after William Milligan Sloane has so opportunely drawn us to such an intimate relationship with that momentous period? Who will fail to render grateful tribute to John Bache McMaster for the exhaustive research which has enabled him, in such graceful deliverance, to acquaint us so accurately with every
se of the career of our great Republic, whether in the days of its
ing prosperity, or in the days of its grave vicissitudes? Who is

richer in variety of attractive themes, presented with instructive method and in pleasing diction, than Harry Thurston Peck? Where is there better fulfillment of so modest an introduction, "This book is an attempt to apply the methods of modern science to the problems of modern business," than in Arthur Twining Hadley's substantial contribution to economic literature in his "account of the relations between private property and public welfare?"

PART I.

ECONOMIC STATISTICS.

MUNICIPAL AND PRIVATE OWNERSHIP OF PUBLIC UTILITIES.

In response to the public demands, the National Department of Labor at Washington, in co-operation with this Bureau, through the trained experts of the former, personally visited the chief cities of Indiana having electric light and power, gas and water plants, and obtained answers to the questions agreed upon, respecting the operation of these industries, in so far as it was possible. The private owners of three electric light and five water works plants of the chief cities of the State declined to allow the facts presented in connection with the name of the State, and one of the larger gas works plants in the State made only a partial report of the facts which was so inadequate as to be worthless.

Tables I to X on the following pages give ownership, years of construction, power used, and a great variety of other facts respecting management, cost and income for the twenty-eight electric light and power plants of the State from which reports were obtained. It will be noted that these tables enter very fully into every feature of the subject of construction, maintenance and income, both of municipal and private ownership.

The eight tables following those referred to give very full analyses of like facts respecting the seven gas plants reported from the principal cities of the State.

This is followed by eleven tables on water plants—twenty-seven in all reporting—showing all phases of the questions of management, income, etc.

The tables given on all these public utilities will enable students to enter pretty fully into the questions which have been much discussed. The names of cities and plants are not given in the tabulations, just as they are not given in like work among the manufacturing plants of the State. The facts, however, are stated on every feature of maintenance and management, and these showing local conditions, obviate the necessity of naming plants and localities in order to fully study all questions connected with them. No attempt was made to obtain these facts in regard to all the plants in the State, the purpose being to secure information only from the representative ones of each class, as this, it was believed, would indicate the deductions as they relate to each industry, and enable any one to study the questions involved in municipal and private ownership.

a Included in wages.
b Not including salaries of officers, superintendents, clerks, etc.
c Not obtainable for reasons stated in note b.
d Including salaries of officers, superintendents, clerks, etc.
e Not obtainable for reasons stated in note d.
f Nothing; natural gas furnished by municipality.
g Not obtainable; total investment exclusive of land not given.
h Power furnished by another plant; the amount paid for same is included in total supplies, but cannot be distributed among the various items.
i Natural gas used for fuel, obtained from wells owned by plant.

a Nothing; income from private users exceeds cost of production.

Councils, under the new law, was 42.55¢ on each \$100 valuation. There are forty counties in which the tax levies are less under the new law, than they were under the old law. Of course, existing county indebtedness was a factor in the levies of many counties, as the law provides that the levy shall cover maturing indebtedness.

The township tax levies for township purposes were less in forty-five counties under the new law, by the Advisory Boards in 1899, than it was under the old law in 1898. The failure to report complete township indebtedness in all the townships of the State, has made it impossible to consider the relation of the rate of the township levies to township debts, as the new law contemplates levies large enough to pay indebtedness here also.

In the matter of comparative expenditures for 1899, estimated expenditures, and the sums appropriated by County Councils for 1900, there are some striking contrasts also. For the fiscal year of 1899 the total expenditures, including salaries in all the counties of the State, were \$9,022,199.

The new law requires that all the heads of departments in the several counties shall estimate the expenditures for each year and report their estimates to the County Councils. This was done in each county, in September, 1899, and the estimates for expenses, including salaries for 1900, was \$8,324,301. Acting upon these estimates, the County Councils of the several counties allowed and appropriated for 1900 the sum of \$6,769,320 for all the counties of the State. The appropriations by the County Councils were below the estimates in eighty-two, as shown by Table No. 1.

Thus it is seen that the County Councils of all the counties of the State appropriated \$1,554,981 less than was estimated for 1900, and \$2,252,879 less than was expended in 1899.

The total county indebtedness of the State is \$7,436,000.

There are five counties which made the same tax levy in 1899 as in 1898, and they have existing debts, the whole of which amounts to \$1,284,718.

There are sixteen counties free from debt, seven of which lowered their levies in 1899, six slightly increased them, and three made the same levy in 1899 as in 1898.

Table II gives county tax levies on each \$100 valuation under the old law in 1898 and under the new law in 1899. The levies mentioned for the townships give the total rate for all the townships in each for all township purposes, under the old law in 1898 and under the new law in 1899. County and township debt and exemptions from taxation under the new law are also shown in this table.

TABLE I.

EXPENDITURES.

Showing County Expenditures in 1899 and Estimated Expenses and Appropriations by County Councils for 1900.

COUNTIES.	Expenditures, Including Salaries.		
	Expended in 1899.	Estimated by Office's for 1900.	Appropriated by Co. Councils for 1900.
Adams	\$52,542	\$61,530	\$77,975

ownships failed to report their indebtedness.
ted.

COUNTY ADMINISTRATION.

The several tables following in regard to county administration are compiled from reports made by County Auditors. It will be noticed that 1900 is not included in these several items of receipts and expenditures. The reason for this is, that the reform law of 1899 changed the county fiscal year to conform to the calendar year, whereas the fiscal year had before ended with May 31st. The several tables, therefore, cover the period of 1899 only.

The usual analysis of expenditures are given, the bonded and floating county debts, rates of interest, etc., are shown for 1899. These features are followed with comparative tables on economic questions and other matters.

EXPENDITURES ON ACCOUNT OF COURTS FOR 1899.

NOTE—The reform law of 1899 changed the county fiscal year to conform to the calendar year and therefore no report could be had for 1900.

DEEDS, MORTGAGES AND SATISFACTIONS.

The following tables show the transactions for the years 1899 and 1900 in the transfers of real estate, mortgages and satisfactions. They are compiled from the reports of County Recorders. It will be noticed that these transactions were all large. On farm property the amount of the mortgages reported for the entire State exceed the satisfactions, while in twenty-five counties the satisfactions exceed in value the sum of the mortgages. In the matter of satisfactions there are many partial payments which do not appear of record, and of course are not reported. There is no way of ascertaining the amount in value of these. This is also especially true of the satisfactions of chattel mortgages.

For 1900 some comparative tables for a series of years are also shown.

PART II.

LABOR STATISTICS.

ORGANIZED LABOR OF INDIANA.

In the work of collecting the data embraced in the several tables on organized labor, the Bureau is under special obligations to secretaries of the several unions throughout the State, and to many others affiliated with organized labor. It was the first attempt for several years to collect the facts bearing on the benefits of organization in its various phases. Many persons connected with the unions of course did not understand the purport and objects of the work, and therefore the answers to the various questions were not as full as it was desired they should be. The benefits to organized labor come largely from a better understanding also by the public of the methods and plans of fraternity in organization. Commercial and other classes are organized everywhere, and their methods and purposes are well understood by the public, and hence the greater need of organization and fraternity in labor.

The Bureau is under special obligations to Mr. John F. White, of Indianapolis, who is familiar with the work, and who aided in its preparatory features, for his assistance both in the preparation of the enquiries and in compiling and tabulating the returns.

Table I gives the unions by trades or occupations and locations; the names and addresses of secretaries; local, national and international organizations of such as reported.

Table II shows membership, increase and decrease for the year, and number of unions returning reports.

Table III gives the wage scales by trades and occupations, increase and decrease for the year ending May 31, 1899, and miscellaneous information. It will be noticed that wages vary much according to occupation, and in many instances average wages is given, especially in the glass industries, and that of other occupations.

Tables IV and V show hours of work per day, number of persons affected; days employed during year; average annual earnings and average daily wages during time of work.

Table VI sets forth the benevolent features of the unions, such as sick benefits, out-of-work and death allowances under the fraternity rules, and the rates of established death benefits.

Table VII is the financial exhibit of annual income and expenditures, defense and strike funds of the various unions by occupations.

Following the tables are given pretty full notes and explanations of the various subjects tabulated.

TABLE I.

ORGANIZED LABOR.

Showing Location of Union, Trade, Name of Secretary, with Address, and Names of Local, National or International Organization, May 31, 1899.

Trade or Occupation, by Cities and Towns.	Name of Secretary.	Secretary's Address.	Name of Local Organization.	Name of National or International Organization.
ALBANY—				
Barbers	R. L. Stratton	Albany	Barbers' Union, No. 40	Journeymen Barbers' International Union.
Clerks	C. E. Lockhart	Albany	Clerks' Union, No. 181	Retail Clerks' National Protective Association.
Glass Workers	Christ Braun	Box 512	Local Union, No. 123	American Flint Glass Workers' Union.
Glass Blowers (green and amber bottles)	Joseph H. Pote	Box 434	Branch, No. 36	Glass Bottle Blowers' Association.
Window Glass Cutters	Wm. Michels	Lock box 473	Window Glass Cutters	Window Glass Cutters' League of America.
Window Glass Flatteners	Fred C. Williams	Albany	Window Glass Flatteners	Window Glass Flatteners of North America.
Window Glass Workers	Jno. Middlehurst	Lock box 53	Local Assembly	Knights of Labor, Assembly No. 300.
ALEXANDRIA—				
Barbers	J. B. Patterson	108 S. Harrison St. ..	Barbers' Union	Journeymen Barbers' International Union.
Bartenders	John Roth	Alexandria	Bartenders' Union	International Bartenders' Union.
Bricklayers	Nick Griffiths	Box 642	Bricklayers' Union	Bricklayers' International Union.
Clerks	W. C. Stewart	Alexandria	Retail Clerk' Union	Retail Clerks' National Protective Association.
Draymen	J. E. Pugh	Alexandria	Draymen's Union	Draymen's International Union.
Glass Workers	A. McMurtry	Box 704	Local Union, No. 3	American Flint Glass Workers' Union.
Iron Workers (finishers)	Frank S. Culbertson ..	Alexandria	Finishers' Union	American Association of Iron and Steel Workers.
Plate Glass Workers	Frank Gach	Alexandria	Local Union, No. 6856	American Federation of Labor.
Puddlers	Wm. Ball	Alexandria	Puddlers' Union	American Association of Iron and Steel Workers.
Window Glass Workers	Thos. Brown	Alexandria	Window Glass Workers	Window Glass Workers' Association of America, Knights of Labor, No. 300.

TABLE I—Continued.

Trade or Occupation, by Cities and Towns.	Name of Secretary.	Secretary's Address.	Name of Local Organization.	Name of National or International Organization.

* Organized May 14, 1899. No report.

NOTE—Failure to report membership on the part of some organizations, and the of a considerable number to send in any report at all, leaves the above table some complete; but as a large preponderance of the blanks returned were evidently fil care, it is valuable as being approximately correct. The above table shows reports unions, while the Bureau sent blanks to something over 500.

In the glass-working industry there was some difficulty in making a proper cl tion on account of the many branches in the trade, which appear often to be organi different bodies; but this was not always made clear by the answers, and is a def ought to be avoided in the future.

It will be noted by reference to Table I, in the list of organizations, that the of Labor appear only among certain branches in the glass-working industry, this b organized labor having otherwise disappeared from the State, so far as the reports i The Knights of Labor membership, which is not separated in the above com amounts to 836, as reported.

Answers to questions relating to the admission of females indicate that in su pations as women can engage in, such as clerking, tailoring, cigarmaking, printi there is no discrimination, and that the same general conditions are required for the organization of clerks, however, reported that females were allowed to work for les

*Average wages. †Time work.

NOTE.—Answers to the questions relating to wage scales were not always given with entire clearness, which has rendered it impossible, in some instances, to give an accurate report, but as a large preponderance of the answers were quite definite in character, the above table reflects established wage schedules with substantial accuracy. The average rates reported are usually made up from earnings under a piece system of work, which largely predominates in the glass-working industries, cigarmaking, railroading, mining, and prevails more or less with quite a number of other occupations.

The tabulation, taken with the odds and ends of miscellaneous information presented, certainly gives an approximately correct showing of the conditions under which organized labor is working as relates to wage scales.

Questions relating to apprentices did not receive responses, either in number or clearness, sufficient to make compilation desirable or valuable, and has therefore been eliminated. Such answers as were received, however, indicate that while a pretty general system of apprenticeship prevails no scale is provided, except in one or two cases.

It is to be noted that this showing is purely one relating to journeymen, and does not include compensations for superintendents and foremen, whose higher pay, when mixed in with the lower wages received by journeymen and general workers, often lead to misleading averages.

Students of these showings should avoid falling into the error of confusing wage scales with actual earnings. Wage scales are the rates established by the unions which journeymen are to receive when at work, and while the foregoing table in a number of instances gives average wages, it is to be understood that they are earnings made up from piece scales. Actual average earnings, annual and daily, are set out in Table 5.

NOTE.—In the above table it will be observed that the tendency has been toward the shortening of hours of work, the printing crafts being the most notable, having cut off one-half hour during the year in a general movement, as shown by some of the returns, for the establishment of a nine-hour day. There appears one exception to this shortening tendency, the machinists having reported an increase of one-half hour during the year.

Barbers and clerks report extra hours for two days in the week, the barbers working from 14 to 15 hours on Wednesdays and Saturdays, and the clerks having extra hours usually on Mondays and Saturdays.

The time reported by the railway organizations is for yard work, all other classes of railroad work being based on a mileage system.

The time scale reported by the brewers applies more particularly to the summer season, shorter hours prevailing in winter.

* The 312 days' basis includes all the holidays of the year.

NOTE.—In the above table the average number of days unemployed is made up from losses on account of no work and strikes. The losses on the latter score, however, were rather insignificant except in a few cases, and are noted in succeeding paragraphs. In making up this table there were only 306 answers in the 408 blanks returned, and some of these answers were not as explicit as they should have been. There was enough definiteness in the great mass of them, however, to render the compilation a reasonably accurate one, and is valuable in showing actual earnings as well as loss of time.

The highest earnings are credited to some of the railway workers and in the glass-working crafts, and the lowest falls to the brickmakers, whose average daily earnings rates at 64 cents. Seven crafts fall below one dollar in their daily average. The general average shows annual earnings to be \$577.72, with a daily average wage of \$1.86.

The replies indicate that in the glass-working industries there is usually an annual shut-down of 60 days, generally in July and August, and being a fixed regulation in the business is not, properly speaking, loss of time on account of no work, although it appears as such in the above table, it not being practicable to make the separation.

Answers to questions relating to strikes do not show that the year witnessed any special amount of turmoil, although there are a few instances reported of a somewhat serious character.

The Butchers' Union, of Indianapolis, report a seven-months' strike for an advance in wages, involving thirty-three members.

At Marion 92 carpenters were out fifteen days on a demand for higher wages.

Four hundred miners at Diamond were out thirty days on account of a refusal to accept a new wage scale. At Evansville 300 miners were on a four-months' strike to enforce wage scale. At Harmony 300 miners were out forty days for a similar reason. At Jackson Hill 140 miners were out eight days. At Linton and Macksville strikes of short duration occurred, involving 317 persons, to establish certain mine regulations in the latter place relating to pay-day.

A union of mixed occupations at South Bend had 152 persons involved in a two-week strike for an increase of pay. They were all employees of the Singer Manufacturing Co.

The Moulders' Union at Marion had ten men on a strike sixty days on account of treatment and the employment of paroled convicts.

The Evansville painters had a three-days' strike for an increase of wages. At Indianapolis the Painters' Union report a lockout beginning October 26, 1898, and still on a strike when filing of their report, 180 men being involved at the beginning.

The plasterers at Marion had twenty-five men out on a sympathetic strike for six days, in the interest of the carpenters.

At Alexandria 400 plate glass workers had a sixty-days' strike against increased wages without extra pay. The same craft, at Kokomo, had 300 persons out twelve days against a piece system.

The Elwood printers had twelve persons out three days for an increase of wages. The pressfeeders at Indianapolis, fifty-eight in number, were out one day for a similar reason.

Window glass workers at Marion, twenty in number, were out thirty-one days for an increase in wages.

Woodworkers at Muncie report a lockout of seventeen men for fourteen days.

*Only one organization reported. †Paid by International Union.

NOTE.—In the above table the figures in the column setting out average sick benefits can not be accepted as conclusive, for the reason that the reports on this feature were so meagre as to render it impossible to make satisfactory averages. In some instances there was only one report on sick benefits out of a dozen or fifteen blanks returned, and in many cases the answers did not exceed two or three for any particular craft. From the nature of many of the answers returned it seems evident that there is no general system providing for the payment of stipulated weekly sick benefits, this form of relief usually being voluntary in character. However, a few of the crafts have an established sick relief system similar to benevolent orders, notably some of the railroad organizations, a few of the glass workers, and the cigarmakers.

What has been said of sick benefits is also true of out-of-work benefits, except that the absence of an out-of-work system of relief is much more pronounced, but few organizations having any provision of this character, the cigarmakers and the German printers being notable exceptions, this form of relief apparently being a part of their system. There seems to have been some misapprehension of the questions relating to out-of-work benefits, it having been confused with strike benefits by many secretaries, the answers often standing for strike benefits, and were eliminated from the compilation when they could be distinguished, as only purely out-of-work benefits were intended to be shown.

The answers to the questions relating to sums paid out for sick and death benefits were somewhat more full, but lack considerable of being complete, it being often stated that there was no specified account of this kind of expenditure, especially if arising from voluntary subscription, and therefore there was no way of making return. Many of the organizations report an established death benefit system, either of local character or through the national bodies, the railroad organizations having a regularly graded insurance department, carrying policies ranging all the way from \$500 to \$4,500.

Total	\$155,274 84	\$126,224 50	\$55,450 25	\$2,045 89

NOTE.—In the above table, of the 408 reports sent in only 324 were prepared with sufficient clearness to be tabulated. Answers to questions relating to initiation fees and dues showed initiation fees to range largely from \$1.00 to \$5.00, sometimes reaching to \$10.00 or \$15.00, but seldom going to \$25.00. A notable exception to these rates, however, was shown among some of the glass-working crafts, particularly the window glass blowers. The regular fee in this trade is reported to be \$25.00, but "foreigners" are required to pay \$500.00, one or two organizations, however, making this latter fee \$200.00. Dues among the various organizations range generally from 25 cents to \$2.50 per month. The rate was shown to be highest among the railroad organizations, most of which carry insurance departments. It will be noted that only three organizations report local defense funds, the answers showing, however, that with most of the organizations large defense funds were provided for by the national bodies, to which the locals contributed stipulated sums. With the glass workers it appears that most of the funds of all kinds are held by the national officers, the local treasury retaining only small sums.

While a showing of this character can only be approximately correct, on account of the failure of some of the organizations to report, it still affords sufficiently accurate data on which to draw reasonably accurate conclusions.

THE LABOR COMMISSION OF INDIANA.

INDIANAPOLIS, IND., October 9, 1900.

Hon. John B. Conner, Chief of the Indiana Bureau of Statistics :

DEAR SIR—In obedience to your request, I herewith transmit for your use the appended summary of the work of the Indiana Labor Commission for the years 1899 and 1900. Owing to the improved industrial and commercial condition of the country, labor troubles have been of less frequency during the past two years than during a like former period. It is also gratifying to state that, with one exception, those which have occurred have not been attended with strife or other disagreeable circumstances that in any way jeopardized law and order. In most instances where failures at settlement occurred they were defeated by the introduction of labor-saving machinery. The following tabulation epitomizes the work done since the date of the Commission's first biennial report :

WORK OF THE LABOR COMMISSION OF INDIANA FOR 1899 AND 1900.

	Number involved.	
1. Noblesville Bottle Co.....	18	Lockout and reduction cause of machinery.
2. Redkey Glass Co.....	100	Lockout and reduction cause of machinery.
3. Swayzee Glass Co.....	50	Lockout and reduction cause of machinery.
4. Streeter Jar and Bottle Works.....	50	Lockout and reduction cause of machinery.
5. Ball Bros., Muncie.....	200	Strike of boys. Defeat
6. American Plate Glass Factory, Alexandria....	800	Lockout. Defeated by of machinery.
7. American Crystal Monument Factory, Arcadia.	20	Successful.
8. American Car and Foundry Co., Jeffersonville.	130	Successful.
9. Buckeye Mines, Linton.....	110	Successful.
10. Muncie Planing Mill.....	100	Successful.
11. Painters' Union, Evansville.....	190	Successful.
12. Coal miners, Littles.....	110	Successful.
13. Coal miners, Linton.....	125	Successful.
14. Casparis stone quarry, Kenneth.....	200	Successful.
15. Cayuga Press Brick Co.....	50	Successful.
16. American Car and Foundry, Jeffersonville, molders.....	150	Successful.
17. Carpenter contractors, Marion.....	150	Successful.
18. American Car and Foundry Co., Jeffersonville.	500	Successful.
19. Warren-Scharf, Marion.....	200	Successful.
20. Strange & Cumming, Van Buren.....	50	Successful.
21. American Tin Plate Co., Elwood.....	500	Failure.
22. Diamond Mine, Clay County.....	60	Successful.
23. John Archbold, Newburg.....	50	Successful.
24. Indiana & Chicago Coal Co., Dugger.....	125	Successful.
25. Kreis Bros., Logansport.....	12	Failure.
26. Minter-Brandt, Coopers, Indianapolis.....	34	Failure.
27. Plumbers, Indianapolis.....	84	Successful.
28. Home Stove Co., Indianapolis.....	48	Successful.
29. Miners, coal, Evan-ville.....	1,100	Successful.
30. Indianapolis Chair Manufacturing Co., Indi- anapolis.....	15	Successful.
31. Studebaker Co., South Bend.....	35	Successful.
32. Horseshoers, Indianapolis.....	40	Successful.
33. Clinton Paving and Building Brick Co.....	50	Successful.
34. Central Steel Works, Indianapolis.....	150	Successful.
35. Marion Fruit and Bottle Works.....	110	Successful.
36. Mesker's Structural Iron Works.....	25	Failure.
37. Ontario Silver Co.'s Works, Muncie.....	30	Failure.
38. Indianapolis plumbers.....	50	Successful.
39. Carpenters, Indianapolis.....	500	Successful.
40. Cable & Kauffman, Washington.....	250	Successful.

L. P. McCORMACK.
Commissioner.

DEPARTMENT OF INSPECTION.

From report under the amended law of 1899, by D. H. McAbee, Inspector.

Hon James A. Mount, Governor of Indiana:

Sir—I have the honor to submit herein my third annual report as State Factory Inspector and as chief of the Department of Inspection. Under laws made by the last Legislature our work is no longer limited to factories, but embraces mercantile establishments, laundries, bakeries, renovating works, quarries and printing offices. This extension in our duties necessitated a change in our name and also required more office force. Consequently ours is no longer the office of Factory Inspection; it is known as the Department of Inspection, and the Legislature granted us an additional deputy and stenographer.

This would be sufficient force to look after the factories, but when it is considered that in addition to factories, we have under our jurisdiction the enforcement of the fire-escape law, the weekly wage law, and all other laws pertaining to labor, it will be seen that our duties are too varied and numerous for us to do justice to the entire State. With the force granted us by the Legislature, we have visited thirty-nine counties, made 1,059 inspections, from which we issued 601 orders.

The report for this year is not as satisfactory as we desired it should be, for these reasons: Last year we reported up to January 1; this year our report closes with October 31, making our work so far as accidents are concerned cover only ten months. The inspections made begin with May 1, the date of the appointment of the deputies, and close with October 31; thus the report shows only six months of actual work.

Relative to the appointment of deputies, I have every reason to be satisfied with the selection of Mr. D. F. Spees, of Vincennes, and Mr. H. A. Richards, of Muncie. The first named is a practical wood worker, and one thoroughly competent to suggest improvements on all such machines; the latter is a worker in iron and steel mills, and, being somewhat familiar with the glass industries, makes an admirable inspector for the gas belt. Since their appointment they have worked faithfully and honestly in the interest of both the employe and the

employer, protecting the one from injury to life and limb, and the other from vexatious suits for damages.

There has been only one suit brought by this department for the violation of the child labor act. The accused plead guilty and was fined. There have been other violators who will yet be filed against now that the deputies understand the method of procedure.

* * * * *

FEMALES IN FACTORIES.

The employment of women and girls in so many industries is reaching such proportions that it is becoming a most serious problem in the labor world. The intense competition is such that the manufacturer who can reduce the cost of production by a fraction of a cent on manufactured articles is the one to receive the orders; to do this, where the work is light, and in some places where it is not, is to employ girls and young women at what appears to them to be fabulous wages, but it is usually about half what men would be paid for the same work. It is a comment on our civilization when young women prefer to be employed where they are compelled to mingle with partially clad men, doing the work of men and boys, for little more than they would receive for doing the work usually allotted to women in the home.

The employing of females recently, by a manufacturing establishment, has caused this question to be brought before the public quite prominently, and a very general discussion of the matter was carried on by the daily press. The employment of women, in this case, while not an innovation, yet they were of such age that we could not take cognizance of them. It has, however, brought the question so prominently before us that we see the helpless condition in which we are placed. These female employes would not, perhaps, have had their morals affected, but the demoralizing feature was that it opened up the way for the introduction of young girls to take their places at the same wages. Then would ensue the loss of all maidenly modesty and those qualities which are so highly prized by the true man.

In other States they have a law which prevents young people under sixteen years of age from working at any employment whereby their lives, limbs, health, or morals are likely to be impaired, and places the authority in the hands of the inspector to say where this may occur. I am firmly convinced that such a law should be in force in this State, as quite a number of mutilated hands and fingers have been the result of not having a law to govern this matter. There should

also be a law to prohibit the employment of girls where their morals might be lowered.

Women and girls are employed in sixty-five different kinds of factories, ranging from toothpick industries to foundries and tin plate works. In many of these the majority of the women are in departments by themselves, where little can be said in the way of condemnation; in others they are mixed up indiscriminately with the men, lifting and carrying loads of seventy-five pounds or more from floor to table and elsewhere. This is un-American and reminds us of what we have heard concerning women who work in mines and shops in other lands.

The custom of having female employes climb stairs to the upper floors to their work is unpardonable, and should not be permitted. All buildings where women or girls are employed should be provided with elevators, and the employes should be permitted to use them. If women must and will engage in the different industries those who employ them should be compelled to furnish them with all the conveniences and accessories that will enable them to still retain their modesty, their attractive appearance, as well as health.

That section of the law which provides for dressing rooms where women and girls are employed, when fully complied with, will have a good effect in that it will make it possible for female employes to be more self-respecting and thus more respected by others.

CONDITION OF FACTORIES.

The improvement in factories, since the passage of the factory inspection law, has been so marked as to call forth favorable remarks from quite a number of the proprietors. There appears to be a new era dawning for the factory employes. This movement has been accelerated by a visit of the Manufacturers' Club, of this city, to Dayton, Ohio, where the model factory of the world is located. This establishment is conducted so unlike any other that we are surprised at the success of the enterprise. Yet we believe that they have nearly solved the labor problem. That any of their employes should ever engage in a riot or be concerned in any of the unlawful practices during a discussion of the wage question is among the faintest possibilities. This is being done, not by co-operation, profit sharing, or any such measure, but is accomplished by taking their employes into their confidence and treating them justly and humanely. They provide for them free baths, hot lunch, dining room and other conveniences not usually

found in factories, and they aver it pays. As this is the main object in giving employment to others, it certainly is worthy of a fair trial by those engaged in supplying the world with its commodities. Some of our manufacturers have adopted many of the methods they saw there, and, as they expressed it, it was a revelation to them, as they never imagined such a system could prove successful.

WEEKLY WAGE LAW.

The wage law which requires that wages be paid weekly, unless otherwise permitted by the Labor Commissioners, will eventually be found to be of much value to the whole people. It was discovered, while visiting the factories last year, that many of the establishments, who were paying their people semi-monthly, would pay the wages due for the last half of the month on the Saturday nearest the 15th of the following month; this would sometimes be the 18th of the month, and thus the company retained in their hands as much as three weeks' wages. This method worked a hardship on the small wage earner, and the law was intended to correct the evil. At the same time there are those establishments, employing a great many hands who work by the piece; they could not make up their payrolls to within six days of such payment. This accounts for the referring of the matter to the Labor Commissioners, who, after notice and hearing, are authorized to grant a longer period between pays.

The enforcement of this law has caused more friction than any other. The larger corporations, who employ thousands of workmen, have their business so systematized that the payroll takes the place of a balance sheet and any other than semi-monthly pays would disorganize this method and cause almost endless trouble. On the other hand, the men claim the law says pay weekly, and they want their money every week. We have been a little slow in this matter, but have felt our way cautiously, not wishing to do an injury to either the employer or the employe, recognizing that each has rights which the other should respect. We think we have been justified in our course and believe that the law will be satisfactorily enforced.

ACCIDENTS.

There have been reported to this office 335 accidents, of which 33 were fatal, 153 serious and 149 less than serious, but causing each individual the loss of more than one week's time. The cost of these accidents to the individual and to the proprietor I have endeavored to show in Exhibit "C."

As stated in previous reports, the reporting of accidents is one of the most difficult features of the law, and it has only been by the most persistent effort on our part that we have been able to receive the number we have. Many of these have been secured through the aid of a clipping bureau and by the close perusal of the daily papers. Some of these accidents are slight, others are serious, and of the fatal ones one-fourth have occurred because of the lack of legislation governing the inspection of boilers and the licensing of engineers. Both these measures were defeated by the Legislature at its last session. Since the adjournment of that body eight deaths caused by boiler explosions in sawmills have been reported to this office. We firmly believe these could have been avoided had proper laws been in force. Recently this department received notification from a health officer that a boiler in use in his district was thought to be in a dangerous condition, and we were notified to make an inspection of the same. While there is no law directly bearing on boiler inspection, section 13, chapter 142, gives the chief inspector power to appoint a competent person to examine into anything reported as being dangerous to life and limb. After consulting the Attorney-General, I had a reputable firm make an inspection of the boiler and they reported to me that it was in an unsafe and dangerous condition. Its further use was prohibited until repaired. By so doing I have no doubt that an explosion was averted and lives saved. Should this example be followed by other health officers it would have a beneficial effect.

It is to be deplored that the boiler inspection bill and the licensing engineers' bill were defeated at the last meeting of the Legislature. We are firmly convinced of their usefulness. They were defeated by the cry of "economy," when the facts are that the fees from the licensing engineers' bill would have paid the expenses of the boiler inspector.

In examining into the cause of explosions, previously spoken of, it was found that two of them were caused by incompetent engineers and the lack of proper water gauges. Two of these boilers were so old that no one was positive about their age; the water gauges were of the crudest kind, having the old-fashioned safety-valves, which were liable to stick. In one instance it was reported that the safety valve was tied down. With such appliances and with men in charge who know nothing of the force generated by the introduction of water into a superheated boiler, we are not surprised at the number of accidents. It is astonishing that more do not occur.

While all accidents are to be deplored, there are a few which excite our sympathy beyond the ordinary. These are cases where boys and

young men have lost hand or arm by their being caught on either pulley or cog and drawn into them, crushing the arm or hand to pulp. Such accidents occur where there appears to be no danger but the meddlesome, active boy is everywhere, and often suffers for his enterprising nature. Particular attention is now being paid to the unguarded places, but I would suggest that boys under sixteen years of age should not be permitted to have charge or work at any machine or place where life, limbs or morals are endangered.

FIRE PROTECTION.

That there has not been a disaster from fire in some of our hotels or other buildings has been because fortune favored us, not because we were amply protected. Hotel fires are not frequent, but when they do occur are usually accompanied with a large loss of life.

Heretofore we have not had any specific law bearing on this subject. Even the present law does not apply to hotels or lodging houses unless they are more than three stories high. There are many hotels in the State which have only one stairway leading to the third floor, with its narrow corridors. Should this stairway be cut off by fire, there is no other means of egress left for the guests except the windows. Should the law relating to these buildings be complied with there would not be sufficient protection provided for the occupants of them. The fire escapes are placed at the end of the corridors that they may be of easy access; these are the first places to become filled with smoke, compelling the guests to grope their way through them to the fire escapes. This could be easily remedied were there fire or smoke stops placed at the end of and at the intersection of all corridors; or by extending a balcony around under the windows, as is done on some of the hotels in other States. We found a few hotels in the larger cities provided with a straight ladder escape, usually placed beside the window, often without platform or balcony. Such escapes would be serviceable to very few people, and for women, especially with a child in their arms, useless. We have refused to accept these as a sufficient means of escape, and this has, apparently, worked a hardship on some proprietors who have complied with what they understood to be the law. However, the more we see of the straight ladders, the more firmly we are convinced of their uselessness in case of a panic. Consequently we are insisting that they be replaced with the one prescribed by law or a better one.

Our attention has been called to lodging houses in this city, by the occupants, asking me if I could not secure them some protection in

case of fire; but, having jurisdiction only where the buildings are three stories high, I have been unable to do so. Ample means should be provided for all buildings, regardless of their height.

The law providing for fire-proof curtains in theaters is being enforced as rapidly as we can reach the different cities containing opera houses. The modern buildings used for this purpose are generally provided with ample exits, but the older ones are, many of them, constructed without the least possible chance of escape, except through the one entrance, which is often built as though it was intended to stand, rather than to render a quick means of egress possible. To make escapes on buildings of this kind, without remodeling of the same is quite an undertaking and sometimes an impossibility. The absent-seekers will, however, be better protected in the future than they have been in the past.

RECAPITULATION.

Counties visited	39
Number of inspections made	1,059
Number of male employees reported	61,202
Number of female employees reported	11,449
Number of males under sixteen reported	1,694
Number of females under eighteen reported	661
Total number of employees	73,238
Number of orders issued	601
Number of accidents reported	327
Fatal accidents reported	33
From boiler explosions	8
Miscellaneous causes	25
Arms lost	4
Fingers amputated	72
Amount appropriated unexpended	\$235 32

LABOR COMMISSION LAW.

§ 228 Approved February 26, 1890.

Section 1 That there shall be, and is hereby created a commission to be composed of two electors of the State, which shall be designated the Labor Commission, and which shall be charged with the duties and vested with the powers hereinafter enumerated.

Sec. 2 The members of said Commission shall be appointed by the Governor, by and with the advice and consent of the Senate, and

shall hold office for four years and until their successors shall have been appointed and qualified. One of said Commissioners shall have been for not less than ten years of his life an employe for wages in some department of industry in which it is usual to employ a number of persons under single direction and control, and shall be at the time of his appointment affiliated with the labor interest, as distinguished from the capitalist or employing interest. The other of said Commissioners shall have been for not less than ten years an employer of labor for wages in some department of industry in which it is usual to employ a number of persons under single direction and control, and shall be at the time of his appointment affiliated with the employing interest as distinguished from the labor interest. Neither of said Commissioners shall be less than forty years of age; they shall not be members of the same political party, and neither of them shall hold any other State, county, or city office in Indiana during the term for which he shall have been appointed. Each of said commissioners shall take and subscribe an oath, to be indorsed upon his commission to the effect that he will punctually, honestly and faithfully discharge his duties as such Commissioner.

Sec. 3. Said Commission shall have a seal and shall be provided with an office at Indianapolis, and may appoint a Secretary who shall be a skillful stenographer and typewriter, and shall receive a salary of six hundred dollars per annum and traveling expenses for every day spent in the discharge of duty away from Indianapolis.

Sec. 4. It shall be the duty of said Commissioners upon receiving credible information in any manner of the existence of any strike, lockout, boycott, or other labor complication in this State, to go to the place where such complication exists, put themselves into communication with the parties to the controversy and offer their services as mediators between them. If they shall not succeed in effecting an amicable adjustment of the controversy in that way they shall endeavor to induce the parties to submit their differences to arbitration, either under the provisions of this act or otherwise, as they may elect.

Sec. 5. For the purpose of arbitration under this act, the Labor Commissioners and the Judge of the Circuit Court of the county in which the business in relation to which the controversy shall arise shall have been carried on, shall constitute a Board of Arbitrators, which may be added, if the parties so agree, two other members, one to be named by the employer and the other by the employes in the arbitration agreement. If the parties to the controversy are a railroad company and employes of the company engaged in the running

ans, any terminal, within this State, of the road, or of any division thereof, may be taken and treated as the location of the business within the terms of this section for the purpose of giving jurisdiction to the Judge of the Circuit Court to act as a member of the Board of Arbitration.

Sec. 6. An agreement to enter into arbitration under this act shall be in writing, and shall state the issue to be submitted and decided, and shall have the effect of an agreement by the parties to abide by and perform the award. Such agreement may be signed by the employer as an individual, firm or corporation, as the case may be, and execution of the agreement in the name of the employer by any agent or representative of such employer then and therefore in control or management of the business or department of business in relation to which the controversy shall have arisen, shall bind the employer. On the part of the employees, the agreement may be signed by them in their own person, not less than two-thirds of those concerned in the controversy signing, or it may be signed by a committee by them appointed. Such committee may be created by election at a meeting of the employees concerned in the controversy at which not less than two-thirds of all such employees shall be present, which election and the fact of the presence of the required number of employees at the meeting shall be evidenced by the affidavit of the chairman and secretary of such meeting attached to the arbitration agreement, but any employee concerned in any such controversy shall be accorded a hearing before such Board. If the employees concerned in the controversy, or any of them, shall be members of any labor union or workingmen's society, they may be represented in the execution of said arbitration agreement by officers or committeemen of the union or society designated by it in any manner conformable to its usual methods of transacting business, and others of the employees represented by committee as hereinbefore provided.

Sec. 7. If upon any occasion calling for the presence and intervention of the Labor Commissioners under the provisions of this act, one of said Commissioners shall be present and the other absent, the Judge of the Circuit Court of the county in which the dispute shall have arisen, as defined in section 5, shall, upon the application of the Commissioners present, appoint a Commissioner pro tem. in the place of the absent Commissioner, and such Commissioner pro tem. shall exercise all the powers of a Commissioner under this act until the termination of the duties of the Commission with respect to the particular controversy upon the occasion of which the appointment shall have been made, and shall receive the same pay and allowances pro-

vided by this act for the other Commissioners. Such Commissioners pro tem. shall represent and be affiliated with the same interests as the absent Commissioner.

Sec. 8. Before entering upon their duties the arbitrators shall take and subscribe an oath or affirmation to the effect that they will honestly and impartially perform their duties as arbitrators and a just and fair award render to the best of their ability. The sittings of the arbitrators shall be in the court room of the Circuit Court, or such other place as shall be provided by the County Commissioners of the county in which the hearing is had. The Circuit Judge shall be the presiding member of the Board. He shall have power to issue subpoenas for witnesses who do not appear voluntarily, directed to the Sheriff of the county, whose duty it shall be to serve the same without delay. He shall have power to administer oaths and affirmations to witnesses, enforce order, and direct and control the examinations. The proceedings shall be informal in character, but in general accordance with the practice governing the circuit courts in the trial of civil causes. All questions of practice, or questions relating to the admission of evidence shall be decided by the presiding member of the Board summarily and without extended argument. The sittings shall be open and public or with closed doors, as the Board shall direct. If five members are sitting as such Board three members of the Board agreeing shall have power to make an award, otherwise two. The Secretary of the Commission shall attend the sittings and make a record of the proceedings in shorthand, but shall transcribe so much thereof only as the Commission shall direct.

Sec. 9. The arbitrators shall make their award in writing and deliver the same with the arbitration agreement and their oaths as arbitrators to the Clerk of the Circuit Court of the county in which the hearing was had, and deliver a copy of the award to the employer and a copy to the first signer of the arbitration agreement on the part of the employees. A copy of all the papers shall also be preserved in the office of the Commission at Indianapolis.

Sec. 10. The Clerk of the Circuit Court shall record the paper delivered to him as directed in the last preceding section, in the order-book of the Circuit Court. Any person who was a party to the arbitration proceedings may present to the Circuit Court of the county in which the hearing was had, or the Judge thereof in vacation, a verified petition referring to the proceedings and the record of them in the order-book and showing that said award has not been complied with stating by whom and in what respect it has been disobeyed. And thereupon the Court or Judge thereof in vacation, shall grant a writ

against the party or parties so charged, to show cause within five days why said award has not been obeyed, which shall be served by the Sheriff as other process. Upon return made to the rule the Judge or Court, if in session, shall hear and determine the questions presented and make such order or orders directed to the parties before him in personam, as shall give just effect to the award. Disobedience by any party to such proceedings of any order so made shall be deemed a contempt of the court and may be punished accordingly. But such punishment shall not extend to imprisonment except in case of willful and contumacious disobedience. In all proceedings under this section the award shall be regarded as presumptively binding upon the employer and all employees who were parties to the controversy submitted to arbitration, which presumption shall be overcome only by proof of dissent from the submission delivered to the arbitrators, or one of them, in writing before the commencement of the hearing.

Sec. 11. The Labor Commission, with the advice and assistance of the Attorney-General of the State, which he is hereby required to render, shall make rules and regulations respecting proceedings in arbitrations under this act not inconsistent with this act or the law, including forms, and cause the same to be printed and furnished to all persons applying therefor, and all arbitration proceedings under this act shall thereafter conform to such rules and regulations.

Sec. 12. Any employer and his employees, between whom differences exist which have not resulted in any open rupture or strike, may of their own motion apply to the Labor Commission for arbitration of their differences, and upon the execution of an arbitration agreement as hereinbefore provided a Board of Arbitrators shall be organized in the manner hereinbefore provided, and the arbitration shall take place and the award be rendered, recorded and enforced in the same manner as in arbitrations under the provisions found in the preceding sections of this act.

Sec. 13. In all cases arising under this act requiring the attendance of a Judge of the Circuit Court as a member of an Arbitration Board, such duty shall have precedence over any other business pending in his court, and if necessary for the prompt transaction of such other business it shall be his duty to appoint some other Circuit Judge, or Judge of a Superior or the Appellate or Supreme Court to sit in the Circuit Court in his place during the pendency of such arbitration, and such appointee shall receive the same compensation for his services as is now allowed by law to Judges appointed to sit in case of change of Judge in civil actions. In case the Judge of the Circuit Court, whose duty it shall become under this act to sit upon any Board

of Arbitration, shall be at the time actually engaged in a trial which can not be interrupted without loss and injury to the party which will in his opinion continue for more than three days, or is disabled from acting by sickness or otherwise, it shall be the duty of such Judge to call in and appoint some other Circuit Judge, or some Judge of a Superior Court, or the Appellate or Supreme Court, to sit upon such Board of Arbitrators, and such appointed Judge shall have the same power and perform the same duties as members of the Board of Arbitration as are by this act vested in and charged upon a Circuit Judge regularly sitting, and he shall receive the same compensation now provided by law to a Judge sitting by appointment in a change of Judge in civil cases, to be paid in the same way.

Sec. 14. If the parties to any such labor controversy as is provided in section 4 of this act shall have failed at the end of five days after the first communication of said Labor Commission with them to settle their differences amicably, or to agree to submit the same to arbitration, it shall be the duty of the Labor Commission to proceed at once to investigate the facts attending the disagreement. In such investigation the Commission shall be entitled, upon request, to the presence and assistance of the Attorney-General of the State, or by deputy, whose duty it is hereby made to attend without compensation upon request by letter or telegram from the Commission. For the purpose of such investigation the Commission shall have the power to issue subpoenas, and each of the Commissioners shall have the power to administer oaths and affirmations. Such subpoena shall be under the seal of the Commission and signed by the Secretary of the Commission, or a member of it, and shall command the attendance of the person or persons named in it at a time and place named in the subpoena. Such subpoena may be served and returned as other process by any sheriff or Constable in the State. In case of disobedience of any subpoena, or the refusal of any witness to testify, the Circuit Court of the county within which the subpoena was issued, or the Judge thereof in vacation, shall, upon the application of the Labor Commission, make a rule against the disobeying person or persons, or the person refusing to testify, to show cause forthwith why he or they should not obey such subpoena, or testify as required by the Commission, or be adjudged guilty of contempt, and in such proceedings such court, or the Judge thereof in vacation, shall be empowered to compel obedience to such subpoena as in the case of subpoena issued under the order of the authority of the court, or to compel a witness to testify as witnesses in court are compelled to testify. But no person shall be required to attend as a witness at any place outside the county of his residence.

Witnesses called by the Labor Commission under this section shall be paid \$1.00 per diem fees out of the expense fund provided by this act, if such payment is claimed at the time of their examination.

Sec. 15. Upon the completion of the investigation authorized by the last preceding section, the Labor Commission shall forthwith report the facts thereby disclosed affecting the merits of the controversy in succinct and condensed form to the Governor, who, unless he shall perceive good reason to the contrary, shall at once authorize such report to be given out for publication. And as soon thereafter as practicable, such report shall be printed under the direction of the Commission and a copy shall be supplied to any one requesting the same.

Sec. 16. Any employer shall be entitled, in his response to the inquiries made of him by the Commission in the investigation provided for in the two last preceding sections, to submit in writing to the Commission, a statement of any facts material to the inquiry, the disclosure of which would be likely to be injurious to his business, and the facts so stated shall be taken and held as confidential, and shall not be disclosed in the report or otherwise.

Sec. 17. Said Commissioners shall receive a compensation of seven hundred dollars each per annum, and actual and necessary traveling expenses while absent from home in the performance of duty, and each of the two members of a Board of Arbitration chosen by the parties under the provisions of this act shall receive five dollars per day compensation for the days occupied in service upon the Board. The Attorney-General, or his deputy, shall receive his necessary and actual traveling expenses while absent from home in the service of the Commission. Such compensation and expenses shall be paid by the Treasurer of State upon warrants drawn by the Auditor upon itemized and verified accounts of time spent and expenses paid. All such accounts, except those of the Commissioners, shall be certified as correct by the Commissioners, or one of them, and the accounts of the Commissioners shall be certified by the Secretary of the Commission.

Sec. 18. For the payment of the salary of the Secretary of the Commission, the compensation of the Commissioners and other arbitrators, the traveling and hotel expenses herein authorized to be paid, and for witness fees, stationery, postage, telegrams and office expenses there is hereby appropriated out of any money in the Treasury, not otherwise appropriated, the sum of five thousand dollars for the year of 1899 and five thousand dollars for the year 1900.

Sec. 19. All laws and parts of laws conflicting with any of the provisions of this act are hereby repealed.

WEEKLY PAYMENT WAGES LAW.

[S. 134. Approved February 28, 1899.]

Section 1. That every person, company, corporation, or association employing any person to labor, or in any other service for hire, shall make weekly payments for the full amount due for such labor or service, in lawful money of the United States to within six days or less of the time of such payment; but if, at any time of stated payment, any employe as aforesaid shall be absent from his regular place of labor or service, he shall be paid in like manner thereafter on demand: Provided, That this act shall not apply to any employe engaged by a common carrier in interstate commerce: and, Provided, That the Labor Commissioners of the State, after notice and hearing, may exempt any of the aforesaid parties whose employes prefer a less frequent payment, from paying any of its employes weekly, if, in the opinion of the said Commissioners, the interests of the public and of such employes will not suffer thereby.

Sec. 2. The Chief Inspector of the Department of Inspection of this State, or any person interested, may bring suit in the name of the State in any court of competent jurisdiction, and the prosecuting attorney of any county wherein such suit is brought, shall prosecute the same against any person, company, corporation or association that neglects or refuses to comply with section 1 of this act, within ten days after such payment is due and left unpaid; and in case judgment is rendered in favor of said employe and against said defendant for the sum alleged to be due or any part thereof, six per centum of such sum shall be added to such judgment from the time when payment was due; and a penalty of fifty per centum of the amount of such judgment shall be assessed and collected from said defendant by said court and paid into the school fund of the State.

Sec. 3. It shall be unlawful for any employer to assess a fine on any pretext against any employe and retain the same or any part thereof from the wages of said employe at the time of payment fixed in this act, or at any other time, and a change in the current rate of wages paid is prohibited without a written notice given to each employe so affected twenty-four hours before such change shall take place.

Sec. 4. The assignment of future wages, to become due to employes from persons, companies, corporations or associations affected by this act, is hereby prohibited, nor shall any agreement be valid that relieves said persons, companies, corporations or associations from the

obligation to pay weekly, the full amount due, or to become due, to any employe in accordance with the provisions of this act, Provided, that nothing in this act shall be construed to prevent employers advancing money to their employes.

Sec. 5. Any person, company, corporation or association, found guilty by a court of competent jurisdiction of having violated the third and fourth sections of this act, shall be deemed guilty of having committed a misdemeanor, and shall be fined by such court in any sum not exceeding two hundred dollars.

Sec. 6. It is hereby made the duty of the Chief Inspector and of the Department of Inspection to enforce the provisions of this act by the processes of the courts, and in the name of the State; and, upon their failure so to do, any citizen of the State is hereby authorized to do the same in the name of the State.

FACTORY INSPECTION LAW.

[H. 214. Approved March 2, 1899.]

Section 1. That no person under sixteen years of age, and no female under eighteen years of age, employed in any manufacturing or mercantile establishment, laundry, renovating works, bakery or printing office, shall be required, permitted or suffered to work therein more than sixty hours in any one week, nor more than ten hours in any one day, unless for the purpose of making a shorter day on the last day of the week; nor more hours in any one week than will make an average of ten hours per day for the whole number of days which such person or such female shall so work during such week; and every person, firm, corporation or company employing any person under sixteen years of age, or any female under eighteen years of age in any establishment as aforesaid, shall post and keep posted in a conspicuous place in every room where such help is employed a printed notice stating the number of hours of labor per day required of such person for each day of the week, and the number of hours of labor exacted or permitted to be performed by such persons shall not exceed the number of hours of labor so posted as being required. The time of beginning and ending the day's labor shall be the time stated in such notice: Provided, That such female under eighteen and persons under sixteen years of age may begin after the time set for beginning and stop before the time set in such notice for the stopping of the day's labor, but they shall not be permitted or required to perform any labor

before the time stated on the notices as the time for beginning day's labor, nor after the time stated upon the notices as the time for ending the day's labor.

Sec. 2. No child under fourteen years of age shall be employed in any manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office within this city. It shall be the duty of every person employing young persons under the age of sixteen years to keep a register, in which shall be recorded the name, birthplace, age and place of residence of every person employed by him under the age of sixteen years; and it shall be unlawful for any proprietor, agent, foreman or other person connected with a manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office to hire or employ any young person to work therein without there is first provided and placed on file in the office an affidavit made by the parent or guardian stating the age, date and place of birth of said young person; and if a young person have no parent or guardian, then such affidavit shall be made by the young person, which affidavit shall be kept on file by the employer, and said register and affidavit shall be produced for inspection on demand made by the Inspector, appointed under this act. There shall be posted conspicuously in every room where young persons are employed, a list of their names, with their ages, respectively. No young person under the age of sixteen years, who is not able to read and write simple sentences in the English language, except during the vacation of the public schools in the city or town where the minor lives. The Chief Inspector of the Department of Inspection shall have the power to demand a certificate of physical fitness from some regular physician in the case of young persons who may be physically unable to perform the labor at which they may be employed, and shall have the power to prohibit the employment of a minor that can not obtain such a certificate.

Sec. 3. No person or corporation, or officer or agent thereof shall employ any woman or female young person in any capacity for the purpose of manufacturing, between the hours of ten o'clock at night and six o'clock in the morning.

Sec. 4. No person, company, corporation or association shall employ or permit any young person to have the care, custody, management of or to operate any elevator.

Sec. 5. It shall be the duty of the owner or lessee of any manufacturing or mercantile establishment, laundry, renovating works, bakery or printing office, where there is an elevator, hoisting shaft or

to cause the same to be properly and substantially inclosed or secured, if in the opinion of the Chief Inspector it is necessary, to protect the lives or limbs of those employed in such establishment. It shall also be the duty of the owner, agent or lessee of each of such establishments to provide, or cause to be provided, if in the opinion of the Chief Inspector, the safety of persons in or about the premises should require it, such proper trap or automatic doors so fastened in or at all elevator-ways as to form a substantial surface when closed, and so constructed as to open and close by the action of the elevator in its passage, either ascending or descending, but the requirements of this section shall not apply to passenger elevators that are closed on all sides. The Chief Inspector shall inspect the cables, gearing or other apparatus of elevators in the establishments above enumerated and require that the same be kept in safe condition with proper safety devices whereby the cabs or cars will be securely held in event of accident to the cable or rope or hoisting machinery, or from any similar cause.

Sec 6. Proper and substantial handrails shall be provided on all stairways in all establishments above enumerated, and where, in the opinion of the Chief Inspector it is necessary, the steps of said stairs in all such establishments shall be substantially covered with rubber, securely fastened thereon, for the better safety of persons employed in said establishments. The stairs shall be properly screened at the sides and bottom. All doors leading in or to such establishments aforesaid shall be so constructed as to open outwardly where practicable, and shall be neither locked, bolted nor fastened during working hours.

Sec 7. In every manufacturing or other establishment, where the machinery used is propelled by steam, communication shall be provided between each room where such machinery is placed and the room where the engineer is stationed, by means of speaking tubes, electric bells or appliances that may control the motive power, or such other means as shall be satisfactory to the Chief Inspector: Provided, that in the opinion of the Inspector such communication is necessary.

Sec 8. It shall be the duty of the owner, agent, superintendent or other person having charge of any manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office within this State, or of any floor or part thereof, to report in writing to the Chief Inspector all accidents or injury done to any person in such premises within forty-eight hours of the time of the accident, stating as fully as possible the extent and cause of such injury, and the place where the injured person is sent, with such other information relative thereto as may be required by the Chief In-

spector. The Chief Inspector is hereby authorized and empowered to fully investigate the causes of such accident, and to require such reasonable precautions to be taken as will, in his judgment, prevent the recurrence of similar accidents.

Sec. 9. It shall be the duty of the owner of any aforesaid establishment, or his agent, superintendent or other person in charge of the same, to furnish and supply, or cause to be furnished and supplied therein, in the discretion of the Chief Inspector, where machinery is used, belt shifters or other safe mechanical contrivances for the purpose of throwing on or off belts or pulleys; and whenever possible, machinery therein shall be provided with loose pulleys; all vats, pans, saws, planers, cogs, gearing, belting, shafting, set screws and machinery of every description therein shall be properly guarded, and no person shall remove or make ineffective any safeguard around or attached to any planer, saw, belting, shafting or other machinery, or around any vat or pan, while the same is in use, unless for the purpose of immediately making repairs thereto, and all such safeguards shall be promptly replaced. By attaching thereto a notice to that effect, the use of any machinery may be prohibited by the Chief Inspector should such machinery be regarded as dangerous. Such notice must be signed by the Chief Inspector, and shall only be removed after the required safeguards are provided, and the unsafe or dangerous machine shall not be used in the meantime. Exhaust fans of sufficient power shall be provided for the purpose of carrying off dust from emery wheels and grindstones and dust-creating machinery from establishments where used. No person under sixteen years of age, and no female under eighteen years of age, shall be allowed to clean machinery while in motion.

Sec. 10. A suitable and proper wash-room and water-closets shall be provided by the owner, agent or lessee in each establishment above enumerated, and such water-closets shall be properly screened and ventilated and be kept at all times in a clean condition, with not less than one seat for each twenty-five persons, and one seat for each fraction thereof above ten, employed in such establishment; and if women and girls are employed in any such establishment, the water-closets used by them shall have separate approaches and be separate and apart from those used by the men. All water-closets shall be kept free of obscene writing and marking. A dressing room shall be provided for women and girls, when required by the Chief Inspector, in any establishment aforesaid in which women and girls are employed; and the employer of such women and girls shall provide a suitable seat for the use of each female employe placed conveniently

where she works, and shall permit the use of the same when she is not necessarily engaged in the active duties for which she is employed, and such seats shall be constructed or adjusted where practicable so as to be a fixture and not obstruct such female when actually engaged in the performance of such duties when such seat can not be used.

Sec. 11. Not less than sixty minutes shall be allowed for the noon meal in any aforesaid establishment in this State. The Chief Inspector shall have the power to issue written permits in special cases, allowing shorter meal time at noon, and such permit must be conspicuously posted in the main entrance of the establishment, and such permit may be revoked at any time the Chief Inspector deems necessary, and shall only be given where good cause can be shown.

Sec. 12. The walls and ceilings of each room in every establishment aforesaid, shall be lime-washed or painted, when in the opinion of the Chief Inspector it shall be conducive to the health or cleanliness of the persons working therein.

Sec. 13. The Chief Inspector, or other competent person designated for such purpose by the Chief Inspector, shall inspect any building used as aforesaid, or anything attached thereto, located therein, or connected therewith which has been represented to be unsafe or dangerous to life or limb. If it appears upon such inspection that the building or anything attached thereto, located therein, or connected therewith, is unsafe or dangerous to life or limb, the Chief Inspector shall order the same to be removed or rendered safe and secure, and if such notification be not complied with within a reasonable time, he shall prosecute whoever may be responsible for such delinquency.

Sec. 14. No room or rooms, apartment or apartments in any tenement or dwelling house shall be used for the manufacture of coats, vests, trousers, knee-pants, overalls, cloaks, furs, fur trimmings, fur garments, shirts, purses, feathers, artificial flowers or cigars, for sale, excepting by the immediate members of the family living therein. No person, firm or corporation, shall hire or employ any person to work in any one room or rooms, apartment or apartments, in any tenement or dwelling house, or building in the rear of a tenement or dwelling house at making, in whole or in part, any vests, coats, trousers, knee-pants, fur, fur trimmings, shirts, purses, feathers, artificial flowers or cigars, for sale, without obtaining first a written permit from the Chief Inspector, which permit may be revoked at any time the health of the community, or of those employed therein, may require it, and which permit shall not be granted until an inspection of such premises is made by the Chief Inspector or a Deputy Inspector,

and the maximum number of persons allowed to be employed there shall be stated in such permit. Such permit shall be framed and posted in a conspicuous place in the room, or in any one of the rooms to which it relates.

Sec. 15. No less than two hundred and fifty cubic feet of air space shall be allowed for each person in any work-room where persons are employed during the hours between six o'clock in the morning and six o'clock in the evening, and not less than four hundred cubic feet of air space shall be provided for each person in any work-room where persons are employed between six o'clock in the evening and six o'clock in the morning. By a written permit the Chief Inspector may allow persons to be employed in a room where there are less than four hundred cubic feet, but not less than two hundred and fifty cubic feet of air space for each person employed between six o'clock in the evening and six o'clock in the morning: Provided, Such room is lighted by electricity at all times during such hours while persons are employed therein. There shall be sufficient means of ventilation provided in each workroom of every manufacturing or mercantile establishment, laundry, renovating works, bakery or printing office within this State, and the Chief Inspector shall notify the owner in writing to provide, or cause to be provided, ample and proper means of ventilation for such workroom, and shall prosecute such owner, agent or lessee if such notification be not complied with within twenty days of the service of such notice.

Sec. 16. Proprietors, agents or managers of any manufacturing or mercantile establishment, mine or quarry, laundry, renovating works, bakery or printing office, are prohibited from discriminating against any person or persons, or class of labor seeking work, by posting notices or otherwise.

Sec. 17. It shall be unlawful for notaries public and other officers to receive more than ten cents for the preparing and certifying to a "Certificate of Parent or Guardian," provided for in this act.

Sec. 18. The language used in this act shall be interpreted to have the following meaning: The word "person" means any individual, corporation, partnership, company or association. The word "child" means a person under the age of fourteen years. The word "young person" means a person of the age of fourteen years and under the age of eighteen years. The word "woman" means a female of the age of eighteen years and upwards. The words "manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office" means any mill, factory, workshop, store, place of trade or other establishment where goods, wares or merchandise are

manufactured or offered for sale, or any mine or quarry where coal and stone are mined and quarried for the market, and persons are employed for hire.

Sec. 19. For the purpose of carrying out the provisions of this act, a Department of Inspection is hereby created, and the Governor shall, and with the advice and consent of the Senate, appoint a Chief Inspector to have charge of said department. Said Inspector shall hold and continue in office after the expiration of his term of office until his successor shall have been appointed and qualified. The term of office of the Chief Inspector shall be for four years. The annual salary of such Chief Inspector shall be one thousand eight hundred dollars (\$1,800) and actual expenses when absent from home in the discharge of his official duties. Said Chief Inspector shall, by and with the consent of the Governor, appoint two deputy Inspectors, whose salary shall be one thousand dollars (\$1,000) each per annum, and actual expenses when absent from home in discharge of their official duties. But said actual expenses for the Department of Inspection shall in no year exceed the sum of one thousand five hundred dollars (\$1,500), and the duties of the Deputy Inspectors shall be such as shall be assigned them by the Chief Inspector. Said Chief Inspector shall also employ a stenographer at a salary not to exceed six hundred dollars (\$600) per annum. The salary and actual expenses of said Deputy Inspectors and stenographer shall be paid monthly as due, on vouchers duly attested before some officer authorized to administer oaths, and approved and signed by the Chief Inspector and the salary and actual expenses of the Chief Inspector shall be paid in monthly installments, out of the Treasury of the State upon warrant of the Auditor of State, and the total annual appropriation of five thousand nine hundred dollars (\$5,900) for such payments aforesaid, is hereby made out of any moneys in the State Treasury not otherwise appropriated. Provided, That the Auditor of State shall issue no warrant, except upon itemized bills, sworn to, and presented by the Chief Inspector provided for in this act.

Sec. 20. The Custodian of the State Capitol shall assign a suitable convenient room or rooms therein for use as the office of said Department of Inspection, and provide the same with all necessary furniture and janitor service.

Sec. 21. The Chief Inspector shall keep a record of all inspections and examinations made by his department, and copies of all notices and orders made by him, and, at the close of his term of office, transfer the books containing the same to his successor. He shall make an annual report of his doings as such Inspector to the Governor at the

close of each fiscal year, and cause the same to be printed, at the expense of the State, not later than the first day of January next ensuing, in such numbers as the Governor may approve. Such Inspectors and Deputy Inspectors shall have power as notaries public to administer oaths and take affidavits in matters connected with the enforcement of the provisions of this act.

Sec. 22. It shall be the duty of the Chief Inspector to cause this act to be enforced, and to cause all violators of the same to be prosecuted, and for that purpose he is empowered to visit and inspect at all reasonable hours, and as often as shall be practicable and necessary, all manufacturing or other establishments to which this bill relates. It shall be the duty of the Chief Inspector to examine into all violations of laws made for the benefit or protection of labor and to prosecute all violations thereof. It shall be unlawful for any person to interfere with, obstruct or hinder said Chief Inspector or Deputy Inspectors while in the performance of his or their duties, or to refuse to properly answer questions asked by him or them with reference to any of the provisions hereof.

Sec. 23. It shall be the duty of the Chief Inspector to supply all blanks necessary to make reports to his office, as required in this act and be furnished copies of this act, which shall be conspicuously posted or hung, and kept posted or hung, in each workroom of every manufacturing or other establishment to which it relates, in the State, by the proprietor or occupant thereof.

Sec. 24. The Prosecuting Attorney of any county of this State is hereby required upon request of the Chief Inspector, or of any other person of full age, to commence and prosecute to a termination before any court of competent jurisdiction, in the name of the State, action or proceedings against any person or persons reported to him to have violated the provisions of this act.

Sec. 25. Any person who violates or omits to comply with any of the provisions of this act, or who refuses to comply with the orders of the Chief Inspector, properly made under the provisions of this act, or who suffers or permits any young person or child to be employed in violation of its provisions, shall be deemed guilty of a misdemeanor and on conviction shall be fined not more than fifty dollars for the first offense, and not more than one hundred dollars for the second offense, to which may be added imprisonment for not more than ten days, and for the third offense a fine of not less than two hundred and fifty dollars and not more than thirty days' imprisonment in the county jail.

Sec. 26. Any person, company, corporation or association aggrieved by any order of the Chief Inspector may appeal to the Circuit Court in the county where the person, firm or corporation owns, leases or occupies the factory or buildings in relation to which said order relates, within ten days after notice of such order shall have been given. Said appeal shall operate as a supersedeas, shall be made in writing, and contain a brief statement of the facts and reasons for such appeal and a citation for the Chief Inspector to appear before said court, and said court or any Judge thereof may direct the time of appearance and manner of service. Said court may review the doings of the Chief Inspector, may examine the questions in issue, and may confirm, change or set aside the doings of the Chief Inspector, in this particular case, and may make such orders in the premises, including orders as to costs, as it may find to be proper and equitable.

Sec. 27. In case of an appeal from any order of the Chief Inspector the Prosecuting Attorney of the Circuit Court shall appear as counsel for the State to sustain and defend such orders, and in case such order be sustained on such appeal, a fee of twenty-five dollars shall be taxed against the appellant as the Prosecuting Attorney's fee, which fee shall be taxed as costs in the case.

Sec. 28. All laws and parts of laws in conflict with the provisions of this act are hereby repealed.

PART III.

SOCIAL, CIVIL AND CRIMINAL STATISTICS.

SOCIAL, CIVIL AND CRIMINAL STATISTICS.

This part of the report is compiled from numerous reports made to the Bureau by various county officers and others. The tables relating to churches and Sunday schools do not embrace complete returns, but are approximately so. It was hard to interest some church denominations in this work.

The compilations on civil and criminal statistics are from reports made by County Clerks, and are the fullest and most complete ever made to the Bureau. That relating to crime will be found interesting to the student of such matters, as classifying crime in general. The civil causes, etc., marriages and divorces, naturalization and citizenship, are tables also compiled from reports made by County Clerks.

The tables on jail inmates, etc., are made from reports of County Sheriffs.

The tables on poor asylums, inmates, expense, etc., are from two sources, first, from reports made by superintendents of poor asylums for years ending May 31, and secondly, elaborate reports from the State Board of Charities to August 31. These are accompanied with a very full discussion of these topics under the new law, by Prof. Amos W. Butler, Secretary of Board of State Charities.

Three tables are given on life and fire insurance in force, etc.

TOTAL CHURCHES BY COUNTIES FOR 1900.

COUNTIES.	Number of church organizations.	Number of church edifices.	Membership.			Value of church property.	Salary paid ministers.	Other expenses yearly.	Benevo- lent contribu- tions.	Number of Sunday schools.	Number of Sunday school pupils.

FACTS ABOUT THE OPERATION OF THE NEW POOR RELIEF LAWS.

By Amos W. Butler, Secretary Board of State Charities.

Aid given to a person in a public institution is termed indoor relief; help given to one not therein is called outdoor relief. The purpose of this paper is to show the changes that have taken place in our laws of outdoor poor relief and the results obtained therefrom.

Prior to 1895, there was no provision for systematic and uniform reports of poor relief from Township Trustees to anyone. The Trustee stated to the Board of Commissioners the amount needed for poor relief each quarter, and the money was granted in accordance with the request. The Legislature of that year, realizing the importance of some definite information as to existing conditions, causes for relief and the amount of the expenditure, enacted a law requiring that Trustees should make a detailed report, in duplicate, to the County Auditor, one copy of which was to be forwarded by him to the Board of State Charities. These reports give the name, sex, color, age, physical and mental condition of the applicant, together with information concerning each individual who is a member of the family aided, the cause for asking relief, and also the date, character and value of the aid each time relief was given. These reports were to be signed by the Township Trustee. The thought was that in addition to providing the information indicated, by which the problems of pauperism could be studied, the fact that these reports were to be made out would have a deterrent effect upon some who might be receiving help unworthily. The indications given show that this was, without doubt, the case; and while statistics were imperfect for the first year, and there was no means of obtaining information of a reliable character for the time prior thereto, there can be no doubt but that the mere fact of making these reports materially lessened the amount expended by the public in this way. The second year, results were better. Information given was fuller and there was a more general response from the Township Trustees.

From the information obtained from these reports, made by Trustees themselves, the Legislature of 1897 thought it proper to provide that each township should support its own poor. Theretofore Township Trustee drew, with the approval of the Board of County Commissioners, which in many cases was simply a mere formal proceeding, whatever funds were necessary for this purpose from County Treasury. He was not responsible, directly, to those who elected him. The funds at his disposal were derived from another source, and the public, in general, knew nothing of the expenditures made. The Act of 1897 provided that money should be advanced to the Trustee from the County Treasury, as heretofore, but that there should be levied against the property of the township a tax to reimburse the county for the money advanced. When this went into effect and the tax levied for poor relief was given out, the people of the township were able to measure, by some known quantity, the amount being expended to care for that township's poor.

In some localities, the size of the expenditure was surprising. In places where previously there had existed abuses—where the Township Trustee had endeavored to utilize his office of overseer of the poor to accomplish political ends, the substantial people of the community brought plainly to his notice the methods he was pursuing and criticised him considerably by reason of their action in relation thereto. The conditions were brought home to each constituent in the township in which relief was given, and this was another factor in materially reducing the amount of poor relief. The amount of reduction depended upon conditions and the interest aroused. In some townships the amount of relief was reduced by half. In others, no attention was paid, and there was an increase in the amount of relief given.

In a general way, the results of the enactment of these two laws may be said to show two important facts: First, the great number of persons aided by the Township Trustee, second, the amount of levy necessary in each township to pay for this relief. From these, we are enabled to erect two standards of measurement: one, the proportion of population that is helped by the Township Trustee; another, the amount of tax necessary to pay for this relief.

The reports of Trustees, giving information concerning relief furnished by them, bristled with startling facts. The number of persons helped in this State and the amount of relief given was far greater than anyone had dared estimate. For the year ending August 31, 1900 (the first in which fairly full returns were received), the Trustees reported having helped 82,235 persons, at an expense of \$388,341. This does not include the services of the overseer of the poor, in

and outdoor poor relief given by County Commissioners. The number of persons aided by Township Trustees averaged 894 to each county and 81 to each township. In Massachusetts, whose population, according to the census of 1890, is 46,539 greater than that of Indiana during the year 1897, 30,363 persons were aided, at a cost of \$55,107.49. The number of persons aided in Indiana is certainly more than stated. Several persons are frequently reported upon one week without either the number or names being specified. When aid is given for a family, the number of persons is sometimes not given; and a large part of the help given to enable poor children to attend school is not included in the figures.

Much of the relief given by our overseers of the poor is doubtless bestowed upon needy and worthy persons; yet one who looks over the reports made by the Trustees to the Board of State Charities can not but feel that frequently proper investigation and right decision are not made. It is doubtless often easier to give aid than to take the time necessary to investigate the need of it. It is possible to induce visits to the place of relief—to encourage asking aid. Many who come reluctantly, at first, after a few visits become more accustomed to the experience. It is easier to come the second time than the first. Some parents send their children; some husbands send their wives. These thus begin to learn what dependence means. This should not be. It is possible for people to come to expect relief; to depend upon the Trustee as one to whom they can go for help when their earnings are gone. A wise man once said: "He who receives a windfall ever after catches the wind."

In how many localities have the people come to look upon the aid given by the Township Trustee as theirs by right? They say, and some of them have told it to me, "There's Tom Scott—the Township Trustee has helped him. I have just as much right to some of that money as he has." To carry the thought farther, it is but a step to say, "I am going to have some of it;" and following upon such a conclusion comes an appeal for aid.

Some of those upon the rolls are aged persons who have been receiving aid for years. One case comes to mind—that of a woman nearly ninety years of age, who is said to have received aid for about half a century. She and her daughter and grandchild all now receive help, and the latter have from infancy. When I meet with such cases, I am reminded of the old woman in the poor asylum who, when spoken to about bearing her years well, said "La, if you want to live long, just live in the county."

From a prosperous manufacturing county in the State comes the story: A family, consisting of a man aged forty years, his wife : seven children, the oldest being a son aged twenty, has been assisted in the township since January 18, 1888; and from that date until August 31, 1899, a period of eleven and one-half years, has received \$2,000. Although the family lives upon a small rented farm, nothing is done toward making a living.

The other day, following our first heavy snow-fall, there appeared in front of the office of a Charity Organization Society in one of our smaller cities, a carriage. It stopped; the driver sprang down and opened the door; the robes were disturbed and there alighted a woman well dressed, and a little boy without an overcoat. These entered the office of the society. They were received in turn. Upon the officer inquiring what she could do, the woman replied that her little girl was compelled to stay out of school because she had no shoes fit to wear, and that her little boy, to whom she pointed, had no overcoat. The officer looked at her in amazement. Finally, she managed to inquire what was wanted, when the woman replied that she wanted some shoes for her little girl and an overcoat for that boy. The query was whether, in many localities of the State, the immediate applicants for relief wait upon the relief officers in carriages. I told this incident at a mass meeting recently held in another of our smaller cities, the object of which was to consider the question of co-operation in charitable work. When I repeated the query, one of the best-known ladies in that community arose in her place and said, "Mr. Butler, we can duplicate that story in this city."

In a township in another part of the State the physician employed to attend the poor was called to a house where lived a family who, more or less regularly, receives aid from the Township Trustee. The doctor entered the small shanty (its only floor was of earth), and noted the scarcity of furniture and lack of utensils. In the performance of his duties, he was much annoyed by a pup which was continually under his feet. He asked where they got the dog. They replied that they bought it. He then inquired the price. They told him they gave \$5.00 for it. His next inquiry was what they fed it; and they said they bought condensed milk for it.

Perhaps the most unique of all the reports that have come to this office is one in which the Trustee of a certain township, after enumerating all of the answers required to be made, states that the amount given was \$2.50, and the purpose of it the purchase of a marriage license.

Most of our Trustees, it is assumed, have wanted to do what is right. Some have established a business administration and have had notable success. Others have been easy-going and have followed in the footsteps of their predecessors because no one pointed them to a better way. In some instances, the officer abused his trust. His administration became extravagant, and the people outraged and clamorous at the record he made. There was no relief from this abuse under previous existing laws. Wayne Township, in Allen County, for the year ending August 31, 1898, gave relief to the amount of \$9,931.28 to 1,686 persons, and of this \$8,810.19 was, to a greater or less extent, permanent relief. This is more than was given in Centre Township, Marion County, including the city of Indianapolis, for the same year. Of this \$8,810.19 distributed by the Township Trustee, \$6,340.61 was in cash. Cash was given to 570 persons, \$11 having been paid at one time to one party, and as much as \$85 in money being given to one individual in a single year. The past year, the amount of relief in Wayne Township, Allen County, was \$10,297.60. Of this, \$8,341.08 was given to those who were, in a sense, permanent charges, and of the total amount expended in this Township, \$6,090.67 was given in cash. Seventeen professional beggars were helped sixty-two times, one receiving \$43 in cash.

In Columbus Township, Bartholomew County, with a population of 1,386 people were helped at the Trustee's office. If you will make the necessary calculation, you will find that this is about one in every ten of the population of this township. To them was given \$6,644.03, of which \$4,801.98 was permanent relief. Contrast this with Lawrence Township, Dearborn County, where, with a population of 3,717, the total relief given was \$781.33 to 210 persons; or with Connersville Township in Fayette County, where, with a population of 6,724 there was given \$465 in relief to 105 persons, or even with New Albany Township, Floyd County, with a population of 24,156, where 473 persons were helped at a total expense of \$1,503.29. It is interesting to note in what a list of townships the number of persons helped fell below one in ten of the entire enumerated population, and that in some of our counties, as a whole, the number fell considerably below one in twenty.

But there is another way of measuring the comparative relief given, that by proportion of population. The amount of levy for poor purposes in the different townships is an equally good yardstick. When one begins to study this, he is impressed with the fact that the highest levy is not, as a rule, in the townships containing cities and large towns, but in the country districts. Taking the figures of a year ago

the highest rate in Allen County was not in Wayne Township, containing Fort Wayne, where the rate was but six cents, but in Springfield Township where it was eight cents. In Wayne County, in the township containing Richmond, there was a six-cent levy; but in New Garden Township, an agricultural community, there was a twenty-cent levy. In Gibson County, in the township in which Princeton is located, they had a five-cent levy and Wabash Township, in the Wabash bottoms, had a twenty-five-cent levy.

These are but a few of the many striking examples of unsatisfactory results achieved, to which the files in the office of the Board of State Charities bear extensive testimony. As a result of the investigations made in our office and the reports prepared, the Legislature made another step, last winter, in improving our poor laws.

The new law provides that the Trustee shall thoroughly investigate the case of every applicant for relief. He shall encourage the able-bodied to seek employment; shall ascertain whether there are relatives who will assist them; shall co-operate with relief-giving and other charitable societies; shall not help, except by labor, any able-bodied non-resident, nor give transportation to any able-bodied tramp, nor to any non-resident who is sick or infirm, except in the direction of his residence, unless the Trustee can be satisfied that he can be cared for elsewhere. When the Township Trustee has given relief to the amount of \$15.00, or regularly for a period of three months, he is required to make a formal statement of the case to the Board of County Commissioners and secure their authority before granting further relief. In this law is embodied the practice of several of the better known Trustees. Thereby, all have presented to them directions for a uniform and methodical system of administering the law. In reality, save in the limitation of the amount of relief, it is but little different from the former laws in the way the more business-like Trustees administered them. Under the provisions of the County Reform Law, the County Commissioners are deprived of the right they formerly had to give aid to poor who are not inmates of some public institution. After a careful investigation of all the laws bearing upon this subject, the Attorney-General has rendered the opinion that this does not prevent the County Commissioners from advancing to the Township Trustees, as heretofore, money to pay for the relief of the poor. This amount is required to be returned to the county treasury from the township levy the next year.

There is shown in these new laws a clearer appreciation of the theory that the township should provide temporary relief for the out-

dear poor. Permanent and should be given in a public institution at the expense of the county.

Notwithstanding the fact that the bill for the new law was submitted to and approved by a number of the more prominent Township Trustees of the State, it at once became an object of condemnation by many persons occupying that office. Predictions were promptly made that our poor asylums could not hold those for whom they would be required to care. In response to invitations, I visited several counties to discuss with the Commissioners the best means of providing additional accommodations. While several of our poor asylums are too small and need enlarging, I took occasion to say that I was not expecting any very great increase in population on account of the new law. The number of inmates in all the poor asylums of our State on August 31, 1899, was but thirty-one more than on the same date a year before. Then, this was in mid-summer; but even now, from reports that are coming in, we learn that the population is but slightly in excess of that of a year ago.

In a great number of cases, those who were being permanently relieved by the Township Trustee were given the opportunity of going to the poor asylum. It was found to be a very rare thing that they would not, when brought to the test, support themselves, or would not be cared for, in whole or in part, by relatives or friends. An efficient Trustee in a city in the northern part of the State says:

"During this quarter the new law came into effect. Much time was consumed in the investigation of cases on the rolls, to the end that we may know what future dispositions to make of them. Some were given the privilege of further assistance in the county asylum, but all other individuals and families were dropped from the rolls. Only one person availed himself of the privilege of entering the county asylum. This course was decided upon to get rid of subjects who had been upon the rolls through the importunities of friends and benevolent societies, for years. The plan has worked so well that the relief expenses have been only an insignificant sum for the past six months. There has been, apparently, no complaint of suffering from those dropped from the relief rolls, demands for relief being so light for the quarter ending August 31, 1899, that an estimate for two days was ample for a quaker's services. The next report will be very light."

A trustee in one of the larger cities in the gas belt had thirty cases of permanent applicants. He notified them last summer of the law, and that they must either care for themselves, obtain some other person's support or go to the poor asylum. In every case they have made other provision, not a single one has gone to the poor asylum.

The fact is that a remarkably large number of those being helped by the Township Trustee would be classed as permanent dependents. The reports for 1898 show that 31,739 of the 75,119 helped were aided for three months or more, and a large number of these are permanent dependents. These are being cut off. They are either showing their ability to care for themselves, or their friends or relatives have come to their support. Instance after instance is reported where persons have been helped for a generation. From several quarters have come accounts of persons who have been receiving township aid who own considerable property. At a recent meeting of the Township Trustees of this State it was almost the unanimous testimony that tramps promptly stopped asking for aid after the new poor law became effective.

Perhaps the most notable case of abuse corrected by the new law is that of the Trustee of Portage Township, St. Joseph County, which includes the city of South Bend. For the year ending August 31, 1898, poor relief was given by the Trustee in that township to the amount of \$13,102.63. This was but \$200 less than was given by all the Trustees of Marion County, including the city of Indianapolis, for the same year. There seemed to be no way of preventing this enormous expenditure. Shortly after the passage of the new law the Trustee was forced to resign. A new Trustee was appointed, taking charge of the office July 1st. On the second day of August he presented to the Commissioners the names of 330 persons who had received aid between February 1 and August 2, 1899. Of these there were 116 permanent dependents on the list at the latter date. When this list of 116 persons was presented to the Commissioners they did not know which way to turn or what to do in providing relief for them. The poor asylum was full. After consideration they determined that this permanent relief by the Township Trustee must stop, and that those who could not be cared for through their own efforts or those of their friends would be supported by the county in some way at the asylum. When the option was offered but three of the 116 went to the asylum. The others have gone to work, left the country at their own expense, or are being cared for by relatives who are amply able to do so. The Township Trustee writes me: "As far as I can learn there has been no suffering among them." The amount of relief given by the new Trustee in the twenty-four weeks ending January 17, 1900, which you will observe is almost half a year, was \$497.35.

The new law will not prove all that we should like, perhaps. There are changes we should like to make. Let us give it a trial and then judge its results before we ask for radical changes.

is law will be helpful to all the Trustees who earnestly desire to be helped. It will assist them to administer to better purpose the responsible office they hold. Puzzling cases will present themselves. They will have done so before. If proper study is given and there is a thorough co-operation between the Township Overseer of the Poor and the county officials, each case will receive what it merits, no one will be neglected, and the people will be better served. If nothing more is gained by this law than what has been accomplished, it has been worthwhile. But the results that have been achieved before it really began to be operative lead us to believe that greater fruitage yet awaits us. It has been termed by a great student of sociology the most advanced method of poor relief upon the statute books of any State. We believe we are equal to the emergency of satisfactorily administering such a law.

POOR RELIEF BY TOWNSHIP TRUSTEES.

Outdoor Relief in the Several Counties and Townships for the Year Ending August 31, 1899.

PART IV.

THE DISTRIBUTION OF WEALTH.

THE DISTRIBUTION OF WEALTH IN INDIANA.

This is an inquiry never before undertaken by the Bureau, and has required a great deal of time and work to complete it. The results of the inquiry are embraced in ninety-two tables, one for each county, and a recapitulation table for the entire State. The four decennial periods are covered by the facts, 1870 to 1900 inclusive, that the trend and better comparison of conditions among all classes of property owners might be shown. The basis of these facts are the quadrennial appraisement of the real estate, and the annual valuation of personal property and improvements in all the counties, which are carried to the tax duplicates.

While these may not show fully the actual value of property, they are both theoretically and practically accepted by all as correct for the basis of taxation.

The several tables by counties show the number and classes of persons who own property, the amount and value of the same for the four ten-year periods, and the per cent. of population for each period. These tables contain a recapitulation at the bottom of each, showing per cents. of ownership in given valuations. The per cents. of ownership to population for 1900 was necessarily based upon the former census population with added estimates of same by counties, from the best data at hand, as the exact figures of the new census by counties had not yet come to hand when the work was in preparation. But as all are estimated on the same basis, it is believed that the per cents. are approximately correct for 1900 also.

The final recapitulation of the facts for the entire State for 1900 by counties embraces also a recapitulation by per cents. of the total number of property owners in the State in 1900 by valuation, classified into seven classes, from holders of \$300 and less to \$50,000 and more of property. The total number of property owners and of all classes by valuation for the State is 909,220.

The total number of companies and corporations owning \$10,000 and more each for the State in 1900 is 2,330. What part of these are partnerships and what part corporations was not ascertained.

ADAMS COUNTY.

Total value of property in 1870,	\$2,592,485.....	Per capita value,	\$227.75
Total value of property in 1880,	3,446,525.....	Per capita value,	224.01

100,000 to 200,000
200,000 to 500,000
500,000 to 1,000,000
More than 1,000,000.
Companies and cor- porations, \$10,000 or more	3	16	20

67.462 per cent. of the population of the county own no property.	
21.102 per cent. own property valued at	\$1,000 and less.
11.280 per cent. own property valued at	1,000 to \$10,000
.157 per cent. own property valued at	10,000 to 40,000

NOTE.—In all these county tables the “value of property owned” is given in whole numbers, \$300 to \$1,000, and \$1,000 to \$2,000, etc., for convenience of space, but in fact it is \$250 and under \$1,000, etc., throughout the entire series of tables in the columns of property owned. And so the number of owners are nowhere duplicated in the values of the holdings.

ALLEN COUNTY.

Total value of property in 1870, \$12,894,130..... Per capita value, \$296.45
Total value of property in 1880, 20,781,115..... Per capita value, 379.47
Total value of property in 1890, 28,501,685..... Per capita value, 427.38
Total value of property in 1900, 44,017,140..... Per capita value, 493.38

of the property holders own 50,000 and more.

panies and corporations of the State owning property valued at \$10,000 and
number 2,330. What part of this number are partnerships and what number
s, was not ascertained.

PART V.

AGRICULTURAL STATISTICS.

AGRICULTURAL STATISTICS.

The general tables embracing statistics on agriculture are compiled from reports made to the Bureau by the Township Assessors on area, and by Township Trustees, threshing machine men, and others, on yield.

In 1899 the area of wheat was above the average, the number of acres sown the previous fall having been 3,437,577. As a result of a hard winter and little snow protection, 397,644 acres were plowed up in the spring and put to other crops. About 18 per cent. of the remaining area was abandoned as unprofitable at harvest. Thus the yield of wheat for 1899 was reduced to 31,357,096 bushels, which was below an average crop.

The area to wheat in 1900 was 2,674,918, but in consequence of the great damage to the plant by the "fly" only 974,034 acres were harvested. It will be noticed in the tabular statements that no wheat was harvested in twenty-five counties, and that the reduction in yield in the remainder was very great, compared with the usual average. The result was that the yield in the State was but 7,840,947 bushels, the smallest in over forty years.

The area in corn for 1899 was somewhat above the average, and the yield greater than ever before reported, being 151,246,804 bushels.

The area to corn in 1900 was 4,005,766, and the yield 169,926,921 bushels, which is the greatest ever before grown.

By the tabular statements it will be noticed that the oat yields both for 1899 and 1900 were the largest of any previous years. The several tables fully set out the area and production of the minor crops, conditions in live stock, dairy, and other agricultural features for 1899 and 1900.

Several comparative tables on agriculture are also given, viz.: Number of bushels of wheat produced in the past seven years, by counties and by the year; number of bushels of corn in seven years by counties; annual production of oats for seven years; production of Irish potatoes annually in the past seven years, and comparative tables showing number of live stock and domestic animals for the past six years.

Another interesting comparative table on production is one giving the chief farm crops for ten years by counties, showing the square miles of

each county, and the average annual yield, total annual average of each class of production, and the average value of all land per square mile in each county.

The several tables on live stock and domestic animals for 1900 are also embraced in these tables on farm industries. The table on live stock is a summary by counties, giving square miles, average annual number of domestic animals for five years, annual average values of all animals for the same period, and value per square mile in each county.

CANADA THISTLE LAW.

[S. 168. Approved February 24, 1899.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That section one (1) of the above entitled act be, and the same is hereby amended to read as follows, to wit:

Section 1. Be it enacted by the General Assembly of the State of Indiana, That section two hundred and thirteen (213) of said act be amended to read as follows, to wit:

Section 213. Any person or persons who shall knowingly allow Canada thistle or thistles to grow and mature, or shall allow any Canada thistle or thistles to grow until they or any of them become of the length of four inches, measuring from the surface of the soil to the end or tip of the stem above the surface of the ground, upon his, her or their land, or upon any land which they may have under their charge or control; and every Supervisor of roads, or other officer having charge of or control over highways, who shall knowingly allow any Canada thistle or thistles to grow and mature, or grow to the length of four inches as above defined, in any public highway, street or alley over which such supervisor or other officer has supervision; and every Roadmaster of any railroad, or other officer having charge of or control over such railroad property, who shall knowingly allow Canada thistles or any Canada thistle to grow and mature, or to grow to the length of four inches as above defined, on any lands held, owned or used by said company or by any person operating such railroad, as depot or station grounds, as right of way or otherwise, for that portion of said railroad over which such roadmaster or other officer has supervision, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined, for the first offense, in any sum not more than twenty dollars, and for the second and each subsequent offense shall, upon conviction, be fined in any sum not less than ten nor more than fifty dollars.

FORESTRY RESERVATION LAW.

[Law without Governor's signature, March 8, 1899.]

SECTION 1. That upon any tract of land in the State of Indiana, there may be selected by the owner, or owners, as a permanent forest reservation, a portion not to exceed one-eighth of the total area of said tract, which shall be appraised for taxation at one dollar per acre.

SEC. 2. If such selection is an original forest, containing not less than 170 trees in each acre, it shall become subject to this act upon filing with the Auditor of the county in which it is situated, a description of the selection as is hereinafter provided.

—STATISTICS.

SEC. 3. If any land owner shall plant not less than 170 trees on each acre of selected forest reservation, and shall cultivate and maintain the same for three years, then it shall become subject to this act, as herein provided.

SEC. 4. Upon any tract selected as a forest reservation which contains 100 or more original forest trees on each acre, the owner may plant a sufficient number of forest trees which shall make up the required 170 trees per acre, when the same shall become subject to this act, as in Section 3.

SEC. 5. No land owner shall receive the benefit of this act who shall permit cattle, horses, sheep, hogs or goats to pasture upon such reservation until said trees are 4 inches in diameter.

SEC. 6. Whenever any tree or trees shall be removed or die, the owner in order to avail himself of this act shall plant other trees in place of such trees as may be removed or die, and protect said trees until they are 4 inches in diameter, shall plant others which shall at all times maintain the full number required by this act.

SEC. 7. Not more than one-fifth of the full number of trees in any forest reservation shall be removed in any one year, excepting that such trees as may die naturally may be removed, when other trees shall be planted.

SEC. 8. Ash, maple, pine, oak, hickory, basswood, elm, black locust, honey locust, Kentucky coffee tree, chestnut, walnut, butternut, larch, tulip tree, mulberry, osage, orange, sassafras and catalpa shall be considered forest trees within the meaning of this act.

SEC. 9. It shall be the duty of the Auditor in every county to keep a record of all forest reservations as the same shall be filed with him, and he shall require the owner or agent to subscribe under oath the extent and description of the land reserved, and that the number of trees is as required by this act, and that he will maintain the same according to the intent of this enactment.

SEC. 10. It shall be the duty of the Assessor to personally examine the various forest reservations when the real estate is appraised, and to note upon his return the conditions of the trees, in order that the intent of this act may be complied with. And if the reservation is properly planted and continuously cared for, he shall appraise the same at one dollar per acre.

AGRICULTURAL SOCIETIES.

[H. 58. Approved February 7, 1899.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That any County or district Agricultural Society, in this State which has by subscription of stock, or otherwise paid for its lands and in which

lands the county has no interest, is hereby authorized and empowered by the votes of those holding a majority of its shares of stock to sell and convey by deed, all or any part of its grounds and either reinvest the proceeds thereof in other lands or, after the payment of all the debts of such society, divide the same among all of its stockholders according to the several interests held by them, and this act shall legalize all sales or transfers of such lands as have heretofore been transferred by such association other than such cases as are now in litigation.

SEC. 2. All laws and parts of laws in conflict with this act are hereby repealed.

LAND DRAINAGE LAW.

[S. 269. Approved March 6, 1899.]

SECTION 1. *Be it enacted by the General Assembly of the State of Indiana,* That section 22 of an act entitled an act to enable owners of lands to drain and reclaim them, when the same cannot be done without affecting the lands of others, prescribing the powers and duties of county commissioners and other officers in the premises, and to provide for the repair and enlargement of such drains and repealing certain acts therein specified and declaring an emergency. Approved April 21, 1881, and being section 4306 of the revised statutes of 1881, be and the same is hereby amended to read as follows:

Section 22. Every person or corporation through whose lands any public ditch is constructed or through whose lands flow any natural stream of water shall be required to keep the same open free and clean of all obstructions upon his or its premises by him or it placed therein; and in case of a failure to do so shall be liable to pay all reasonable and necessary expenses of removing such obstructions. A person or corporation aggrieved by any such obstruction may make a sworn statement of the facts to the County Surveyor, who shall proceed to examine the premises and enquire into the truth of the statement and if he finds the statement to be true, he shall immediately notify the owner of the land on which said obstructions exist to remove the same within a reasonable time, not exceeding twenty days, and if the owner so notified fail to remove the obstruction the Surveyor shall at once cause the same to be removed at the expense of such owner, and certify such expense to the County Auditor who shall place the same together with all fees and other expenses in the case on the tax duplicate as an assessment upon the lands of such person or corporation, and the same shall be a lien upon such lands and shall be collected as other taxes: *Provided*, That water rights acquired or operated for power purposes, shall not be affected by this act.

.

.

PART VI.

STATE INSTITUTIONS.

THE STATE INSTITUTIONS.

The several statistical tables following is the first attempt of the Bureau at collecting and tabulating important matters referring to the State institutions, and of presenting the facts relating to the investments of large sums of public money. These presentations are compiled from reports made to the Bureau by the heads of the several institutions, and give the valuation of the grounds, buildings, equipment and the annual cost of maintenance of each. The expenditures from State appropriations for the years named, and receipts from other sources, are shown in the tables. The number of pupils in the educational and benevolent institutions are also given. The tables referring to the penal and reformatory institutions of the State give for the years named the inmates, physical and moral condition, cost of maintenance, and other features of public interest. Presented in this way, the public may study the work of the State in these several departments of its very important work.

Of the tables referring to Purdue University, it should be borne in mind that in 1897 the fiscal year covering these facts was changed from October 31 to June 30, so as to conform with the United States Government, hence the report given is for the eight (8) months, October, 1896, to June, 1897, inclusive. For the years 1897-1898 the report is given for the fiscal year ending June 30.

The expense per capita for maintenance—\$140—includes many items not usually included under the term "Maintenance." The actual cost for instruction was about \$103 per capita. This item is always larger in a technical school because a considerable amount of money is expended in research publications.
